

Response to Office Action

Applicant Apple Inc. timely responds to the Office Action that issued on August 21, 2018 (the "Office Action"). The Office Action seeks greater specificity as to five (5) descriptions of goods listed in the application's specification. (Office Action at 1-2.) Applicant addresses elsewhere in the TEAS Response to Office Action form the requested amendments as to four (4) of the descriptions by entering them directly into the application's specification of goods.

Applicant respectfully requests, however, that the Examiner withdraw the objection to the applied-for **"computer software, namely, a full line of computer software for business, home, education, entertainment, wellness, and developer use,"** because the TMEP authorizes this "full line of" language and the USPTO has allowed it in the registrations of numerous other marks for software.

Summary of Remarks

The "full line of computer software" language in the application's specification is sufficiently definite because it is limited by certain fields (*i.e.*, business, home, education, entertainment, wellness, and developer use) and it is consistent with USPTO examination procedure. In fact, the USPTO has accepted similar and overlapping "full line of software" language in prior registrations owned by Applicant and has accepted analogous "full line of software" language in prior third-party registrations, one of which registered within the past two weeks. Applicant's intention to use the subject mark with a full line of software for business, home, education, entertainment, wellness, and developer use is evidenced by Applicant's longstanding uses and registrations for its Apple Marks for overlapping goods.

Remarks

Applicant's description of goods is sufficiently definite. T.M.E.P. § 1402.03(c) authorizes the USPTO to accept an identification of goods that refers to "a full line of" a genre of goods. To qualify for the use of "a full line of" language, the applicant's line must be in one class. *Id.* An intent-to-use applicant must also clearly indicate an intention to register the mark for a full line during initial examination, and the circumstances must establish that the applicant's proposed use of the mark for a full line of goods is "credible." *Id.*

Applicant's proposed use of the subject mark for a full line of Class 9 software for business, home, education, entertainment, wellness, and developer use is credible given Applicant's longstanding and extensive use and registration of the mark covering overlapping full line language.

As the Principal Register reflects, Applicant currently owns U.S. Reg. Nos. 3928818 (APPLE), 3679056 (🍏), and 2715578 (🍏), all of which include "a full line of computer software" for fields that overlap with those recited in the present application's specification. The relevant details of these registrations are shown below, and TESS database print-outs for these registrations are annexed as **Exhibit A**.

Registration No.	Mark	Description of Goods
3928818	APPLE	Class 9: ..."a full line of computer software for business, home, education, and developer use; ..."
3679056		Class 9: "...a full line of computer software for business, home, education, and developer use; ..."
2715578		Class 9: "...a full line of computer software for business, home, education, and developer use; ..."

The USPTO currently examines third-party applications for potentially confusingly similar marks against Applicant's existing registrations that cover "a full line of computer software" language. Therefore, the potential harm to third parties if the USPTO approves the applied-for software specification in the current application is *de minimis* at best.

The USPTO has also approved analogous "a full line of software" language in the specifications of third-party applications for marks which are now registered, as set out in the chart immediately below, the full detail of which are set out also in the TESS print-outs annexed as **Exhibit B**.

Registration No.	Mark	Description of Goods
5672174		Class 9: ..."computer software, namely, a full line of computer software for business, business management, accounting, and marketing in the fields of business; ..."
5311758	HEWLETT PACKARD	Class 9: "...house mark for a full line of computer hardware and software; ..."
5205378		Class 9: "...house mark for a full line of computer hardware and software; ..."

Registration No.	Mark	Description of Goods
5205336	HPE	Class 9: "...house mark for a full line of computer hardware and software; ..."
3363317	MICROSOFT DYNAMICS	Class 9: "...computer software, namely, a full line of computer software for business, business management, accounting, marketing and e-commerce applications;
3328002		Class 9: "...a full line of computer software for business, home, and entertainment applications;..."
3361017		Class 9: "...a full line of computer software for business, home, and entertainment applications;..."
3246095	INTERGRAPH	Class 9: "...house mark for a full line of software and programs;..."
3135129	ALTAPOINT	Class 9: "full line of computer software for business and clinical practice management;..."
2200440		Class 9: "house mark for a full line of computer software..."
2364846	 The Learning Company	Class 9: "house mark for a full line of computer software..."
1884217	QUADRALAY	Class 9: "...full line of computer software..."

T.M.E.P. § 1402.03(c) also provides that the nature of the mark and the capacity of the applicant to use the mark as a full line should be considered to determine the credibility of the applicant's claim. *Id.* If the applicant indicates such an intention, the applicant will ultimately need to provide evidence to substantiate use of the mark with the full line. *Id.* Applicant's prior

registrations and longstanding use establish the credibility of Applicant's intention to use the subject mark with a full line of software for business, home, education, entertainment, wellness, and developer use. Applicant also intends to provide evidence that will substantiate use of the subject mark for a full line when it submits its Statement of Use, as required by the T.M.E.P.

Conclusion

Applicant respectfully requests that the USPTO withdraw its objection to the **"computer software, namely, a full line of computer software for business, home, education, entertainment, wellness, and developer use"** description in Applicant's specification. The T.M.E.P. permits the inclusion of this language in an application, particularly when the applicant's use of the subject mark with a full line of a genre of goods is credible. In this instance, Applicant has longstanding rights in the subject mark for a full line of Class 9 computer software, evidenced by at least three (3) prior registrations granted to Applicant with overlapping language. The risk of harm to third parties in granting a fourth registration with "full line of" language, in this instance, would be merely theoretical.

Finally, Applicant notes that numerous parties own registrations that cover "a full line of computer software," similarly limited to specific fields or without such field or function limitations. The most recent registration, Reg. No. 5672174, which covers "computer software, namely, a full line of computer software for business, business management, accounting, and marketing in the fields of business" in Class 9, very recently registered on February 12, 2019.

Having addressed all outstanding issues in the Office Action, Applicant respectfully requests that the USPTO approve the application as amended for publication.

Please contact the Attorney of Record with any questions.

IT infrastructure

automation, IT device lifecycle management, IT security, IT reporting and forecasting, IT infrastructure fa and performance monitoring; computer software for managing IT service desk and IT help desk services; computer software for data protection and data security; computer software for providing security for computers, networks and electronic communications; computer network security software; computer sof for monitoring computer network access and activity; computer software for assessing application secur data and document encryption and decryption software; cryptography software; computer user authentic software; software for information security compliance monitoring, reporting and analytics; IT security intelligence and risk management software; data backup, recovery and archiving software; computer so for data deduplication; database management software; computer software used to read and evaluate c located on global computer networks, databases and/or networks; computer software for application and database integration; data search software, namely, software for creating searchable database of data; computer search engine software; software for searching databases; computer software for creating searchable databases of information and data; computer data warehouse operation and automation soft data center operation and automation software; computer software for data transmission, storage, proce and reproduction; computer software for accessing, querying and analyzing information stored in databa and data warehouses; information and knowledge management software for knowledge capture and management; business intelligence software; computer software that provides real-time, integrated busi management intelligence by combining information from various databases; business analytics software collecting and analyzing data to facilitate business decision making; computer software for use in big da analysis; computer software that automates the processing of un-structured, semi-structured and structu information and data stored on computer networks and the Internet; software for business organization a business process virtualization and management; enterprise resource planning (ERP) software; softwar business risk management; project portfolio management (PPM) software; records management softwa computer e-commerce software to allow users to perform electronic business transactions via a global computer network; software development tools; computer software for computer system and application development, deployment and management; software development tools for the creation of mobile Inter applications and client interfaces; software development tools, namely, software for testing software applications; product lifecycle management software; software-defined infrastructure software, namely, software for virtualization; computer software that provides web-based access to applications and servic through a web operating system or portal interface. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 016. US 002 005 022 023 029 037 038 050. G & S: Printed matter, namely, magazines, printed perio books, newsletters, brochures and journals in the field of computers, computer software and information technology; printed instructional and teaching materials in the field of computers, computer software and information technology; brochures about technological developments; printed reference guides and tech bulletins in the field of computers and information technology; printed product operating and service guide computers and computer peripherals. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 035. US 100 101 102. G & S: Business management; business administration; providing office functi business management consulting services; business consulting services in the field of information techn (IT); business consultation services in the field of business process improvement and outsourcing; busin consultation services in the field of enterprise architecture; IT outsourcing services; business process outsourcing; business strategic planning services in the field of information technology; asset managem services, namely, reporting on service histories, utilization of the IT assets, end of product life informatio replacement costs all related to IT equipment; compilation and systemization of information into compute databases; database management services; online retail store services and ordering services featuring computer hardware, software and peripherals; business services, namely, assisting others in the negotia and development of business partnerships and business alliances; marketing and promotional program services in the field of information and computer technology; customer relationship management service business records management, namely, classification and organization of data for records management purposes; providing a website featuring an online marketplace for sellers and buyers of computer and IT goods and services; business knowledge management services; business data analysis; business risk management consultation. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 036. US 100 101 102. G & S: Insurance claims processing; insurance claims administration; insuranc consultancy; insurance information; insurance services, namely, underwriting extended warranty contrac the field of information technology; insurance services, namely, writing property insurance; financial affa monetary affairs, namely, financial information, management and analysis services; financing of purchas and lease- purchase financing; providing lease financing for IT equipment and computer software; finan

financial risk management consultation. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 037. US 100 103 106. G & S: Repair and installation of information technology (IT) equipment; install maintenance and repair of computers and computer, networking and telecommunications hardware. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 038. US 100 101 104. G & S: Telecommunications services, namely, transmission of voice, data, graphics, images, audio and video by means of telecommunications networks, wireless communication networks, the Internet; information transmission via electronic communications networks; providing secure real time electronic communication over a computer network; providing virtual private network services, namely, private and secure electronic communications over a private or public computer network; telecommunications consultation; providing online chat rooms, electronic bulletin boards and forums for transmission of messages among users in the fields of computers, software, information technology and general interest; streaming audio and video material on the Internet; voice over Internet protocol (VOIP) services; electronic transmission of data via global computer networks. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 041. US 100 101 107. G & S: Educational and training services, namely, conducting classes, workshops, seminars and conferences in the field of computers, software, and information technology; online journals, namely, blogs featuring information in the fields of computers, software, and information technology. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 042. US 100 101. G & S: Scientific research and development; research and development of new products for others; research and development of software; research and development in the field of information technology; design and development of computer hardware and software; computer systems analysis; planning, design and implementation of computer technologies for others; computer systems integration services; computer system administration for others; rental and leasing of computer hardware and computer peripherals; computer consulting services; computer consultation services, namely, advice on designing, selecting, and using computer hardware and systems; computer software consultancy; technological consultation in the field of selection, implementation and use of computer software; consulting services in the field of software as a service; Internet consulting services, namely, technical consulting services in the fields of datacenter architecture, public and private cloud computing solutions, and evaluation and implementation of Internet technology and services; information technology (IT) consulting services; consulting in the fields of applications transformation, integration, modernization, migration, design, development, implementation, testing, optimization, operation and computer project management; consulting in the field of cloud computing and big data analytics; technical consulting services in the field of cloud infrastructure; technical consulting services in the fields of datacenter architecture, public and private cloud computing solutions, and evaluation and implementation of Internet technology and services; consulting in the field of development of security systems and contingency planning for information systems; consulting in the field of computer security; computer consultation in the field of computer data security; IT consulting in the nature of consulting in the field of IT mobility and workplace services; technological consultation in the technology field of unified communications hardware and software; IT consulting in the nature of consulting with respect to the IT aspects of business processes; IT consulting in the fields of customer relationship management, finance administration; consulting services in the field of computer-based information systems for businesses; computer consultation services in the field of application delivery management; computer consulting in the field of web marketing optimization applications; IT consulting in the field of converged IT systems; IT consulting in the fields of IT converged and hyper-converged IT infrastructure; IT consulting in the field of industry services and operations; IT consulting in the environmental and energy efficiency fields; scientific and technological services, namely, research and design in the field of computer networking hardware and computer datacenter architecture; technical consulting services in the field of datacenter architecture; providing temporary use of on-line non-downloadable cloud computing software for use in database management and electronic storage of data; computer hardware and software design and development; computer programming services; software application development, modernization and cloud integration; software installation, maintenance and update services; consulting services in the field of testing the operation and functionality of computers, computer networks and software; business technology software development and consultation services; computer programming services for others in the field of software configuration management; updating and maintaining cloud-based computer software through on-line updates, enhancements and patches; computer technical support services, namely, help desk services for IT infrastructure, computer hardware, computer software, computer peripherals and computer networks; computer technical support services, namely, service desk services for IT infrastructure, operating systems and business and web applications; technical support services, namely, troubleshooting of computer software

and software problems; technical support services, namely, migration of datacenter, server and database applications; technical support services, namely, monitoring of computers, network systems, servers and database applications, and notification of related events and alerts; technical support services, namely, remote real-time computer and network monitoring services; technical support services, namely, remote on-site infrastructure management services for monitoring, administration, and management of public and private cloud computing IT and application systems; consulting services in the field of cloud computing; hosting provider services; hosting software applications for others; cloud hosting of electronic databases; cloud and computer infrastructure hosting services; computer services, namely, providing virtual and non-virtual application servers, web servers, file servers, redundancy servers, and database servers of various capacity to others; rental of computing and data storage facilities of variable capacity, namely, virtual and non-virtual application servers, web servers, file servers, redundancy servers, and database servers, to third parties; computer infrastructure hosting services, namely, providing computer hardware, computer software, computer peripherals to others on a subscription or pay-per-use basis; providing virtual computer systems and virtual computer environments through cloud computing; computer services, namely, integration of private and public cloud computing environments; computer services, namely, remote and on-site management of information technology (IT) systems and software applications for others; cloud computing featuring software for use in database management; database development services; rental of space in a computer co-location facility for containerized data centers of others; data mining services; data backup and data restoration services; data migration services; data encryption and decryption services; cloud computing featuring software for use in database management and data warehousing; electronic data storage; Infrastructure-as-a-Service in the nature of technical support services, namely, remote and on-site infrastructure management services for monitoring, administration and management of public and private cloud computing IT and application systems; temporary use of non-downloadable software for computer and network operation, management, automation, virtualization, configuration, provisioning, deployment, and control; temporary use of non-downloadable software for information technology (IT) management, IT infrastructure management, remote IT infrastructure management, IT asset management and inventory, IT process automation, IT device lifecycle management, IT security, IT reporting and forecasting, IT infrastructure fault and performance monitoring, and facilitating user service desk and help desk functions; temporary use of non-downloadable software for data protection, data security, and computer application and network security; temporary use of non-downloadable software for information security regulatory compliance; temporary use of non-downloadable software for monitoring computer network access and activity; temporary use of non-downloadable software for data encryption and decryption, cryptography, computer user authentication, and information security compliance monitoring, reporting and analytics; temporary use of non-downloadable software for data backup, recovery, archiving, deduplication; temporary use of non-downloadable software for cloud infrastructure management and automation; temporary use of non-downloadable software for cloud, web and application performance monitoring; temporary use of non-downloadable software for database and database management, data warehouse operation and automation, data center operation and automation, application and database integration, data transmission, storage, processing and reproduction, and for accessing, querying and analyzing information stored in databases and data warehouses; temporary use of non-downloadable software for business intelligence, business process insight, data analytics, information management, knowledge management, customer relationship management, and enterprise resource and risk management; temporary use of non-downloadable software for storing, managing, tracking, and analyzing business data; temporary use of non-downloadable search engine software and software for project and records management; temporary use of non-downloadable software for software development, deployment, testing, delivery and application lifecycle management; temporary use of non-downloadable software for converged systems management; temporary use of non-downloadable software-defined infrastructure software for virtualizing and managing computers, computer hardware, computer software, servers, computer networks and data storage; temporary use of non-downloadable software in fields of converged and hyper-converged infrastructure for virtualizing and managing computers, computer hardware, computer software, servers, computer networks and data storage; Software as a Service services, namely, hosting cloud and datacenter infrastructure software for use by others for use in database management; temporary use of non-downloadable software for managing software licenses; electronic storage of digital content, namely, images, text, video and audio data; file sharing services, namely, providing a website featuring technology enabling users to upload and download electronic files. IC 042. US 100 101. G & S: Scientific research and development; research and development of new products for others; research and development of software; research and development in the field of information technology; design and development of computer hardware and software; computer systems analysis; planning, design and implementation of computer technologies for others; computer systems integration services; computer system administration for others; rental and leasing of computer hardware and computer peripherals; computer consulting services; computer consultation services, namely, advice on designing, selecting, and using computer hardware and systems; computer software consultancy; technological consultation in the field of selection, implementation and use of computer software; consulting services in the field of software as a service; Internet consulting services, namely, technical consulting services in the fields of datacenter architecture, public and private cloud computing solutions, and evaluation and implementation of Internet technology and services; information technology (IT) consulting services; consulting in the field of applications transformation, integration, modernization, migration, design, development, implementation, testing, optimization, operation and computer project management; consulting in the field of cloud computing and big data analytics; technical consulting services in the field of cloud infrastructure; technical consulting services in the fields of datacenter architecture, public and private cloud computing solutions, and evaluation and implementation of Internet technology and services; consulting in the field of development of security systems and contingency planning for information systems; consulting in the field of computer security; computer consultation in the field of computer data security; IT consulting in the nature of consulting in the field of IT mobility and workplace services; technological consultation in the technology field of unified communications hardware and software; IT consulting in the nature of consulting with respect to the IT aspects of business processes; IT consulting in the fields of customer relationship management, finance administration, human resources, payroll and document processing; consulting services in the field of computer-based information systems for businesses; computer consultation services in the field of application delivery management; computer consulting in the field of web marketing optimization applications; IT consulting in the field of converged IT systems; IT consulting in the fields of IT converged and hyper-converged IT infrastructure; IT consulting in the field of utility industry services and operations; IT consulting in the environmental and energy efficiency fields; scientific and technological services, namely, research and design in the field of computer networking hardware and computer datacenter architecture; technical consulting services in the field of datacenter architecture; providing temporary use of on-line non-downloadable cloud computing software for use in database management and electronic storage of data; computer hardware and software design and development; computer programming services; software application development, modernization and cloud integration; software installation, maintenance and upgrade services; consulting services in the field of testing the operation and functionality of computers, computer networks and software; business technology software development and consultation services; computer

cloud-based computer software through on-line updates, enhancements and patches; computer technical support services, namely, help desk services for IT infrastructure, computer hardware, computer software, computer peripherals and computer networks; computer technical support services, namely, service desk services for IT infrastructure, operating systems, and business and web applications; technical support services, namely, troubleshooting of computer software problems; technical support services, namely, troubleshooting in the nature of diagnosing computer hardware and software problems; technical support services, namely, migration of datacenter, server and database applications; technical support services, namely, monitoring of computers, network systems, servers and web and database applications, and notification of related events and alerts; technical support services, namely, remote real-time computer and network monitoring services; technical support services, namely, remote and on-site infrastructure management services for monitoring, administration, and management of public and private cloud computing IT and application systems; consulting services in the field of cloud computing; cloud hosting provider services; hosting software applications for others; cloud hosting of electronic databases; cloud and computer infrastructure hosting services; computer services, namely, providing virtual and non-virtual application servers, web servers, file servers, redundancy servers, and database servers of variable capacity to others; rental of computing and data storage facilities of variable capacity, namely, virtual and non-virtual application servers, web servers, file servers, redundancy servers, and database servers, to third parties; computer infrastructure hosting services, namely, providing computer hardware, computer software, computer peripherals to others on a subscription or pay-per-use basis; providing virtual computer systems and virtual computer environments through cloud computing; computer services, namely, integration of private and cloud computing environments; computer services, namely, remote and on-site management of information technology (IT) systems and software applications for others; cloud computing featuring software for use in database management; database development services; rental of space in a computer co-location facility; containerized data centers of others; data mining services; data backup and data restoration services; data migration services; data encryption and decryption services; cloud computing featuring software for use in database management and data warehousing; electronic data storage; Infrastructure-as-a-service in the nature of technical support services, namely, remote and on-site infrastructure management services for monitoring, administration and management of public and private cloud computing IT and application systems; temporary use of non-downloadable software for computer and network operation, management, automation, virtualization, configuration, provisioning, deployment, and control; temporary use of non-downloadable software for information technology (IT) management, IT infrastructure management, remote IT infrastructure management, IT asset management and inventory, IT process automation, IT device lifecycle management, security, IT reporting and forecasting, IT infrastructure fault and performance monitoring, and facilitating user service desk and help desk functions; temporary use of non-downloadable software for data protection, data security, and computer application and network security; temporary use of non-downloadable software for information security regulatory compliance; temporary use of non-downloadable software for monitoring computer network access and activity; temporary use of non-downloadable software for data encryption, decryption, cryptography, computer user authentication, and information security compliance monitoring, reporting and analytics; temporary use of non-downloadable software for data backup, recovery, archiving, deduplication; temporary use of non-downloadable software for cloud infrastructure management and automation; temporary use of non-downloadable software for cloud, web and application performance monitoring; temporary use of non-downloadable software for database and database management, data warehouse operation and automation, data center operation and automation, application and database integration, data transmission, storage, processing and reproduction, and for accessing, querying and analyzing information stored in databases and data warehouses; temporary use of non-downloadable software for business intelligence, business process insight, data analytics, information management, knowledge management, customer relationship management, and enterprise resource and risk management; temporary use of non-downloadable software for storing, managing, tracking, and analyzing business data; temporary use of non-downloadable search engine software and software for project and records management; temporary use of non-downloadable software for software development, deployment, testing, delivery and application lifecycle management; temporary use of non-downloadable software for converged systems management; temporary use of non-downloadable software-defined infrastructure software for virtualizing and managing computers, computer hardware, computer software, servers, computer networks and data storage; temporary use of non-downloadable software in fields of converged and hyper-converged infrastructure for virtualizing and managing computers, computer hardware, computer software, servers, computer networks and data storage; Software as a Service services, namely, hosting cloud and datacenter infrastructure software for use by others for use in database management; temporary use of non-downloadable software for managing software licenses; electronic storage of digital content, namely, images, text, video and audio data; file sharing services, namely, providing a website featuring technology enabling

IC 009. US 021 023 026 036 038. G & S: Apparatus for recording, transmission or reproduction of sound images; blank magnetic data carriers and recording discs; calculating machines; data processing equipment; computers; house mark for a full line of computer hardware and software; data processing apparatus; computer hardware; computer servers; network servers; Internet servers; computer networking and communications hardware; computer network routers, controllers, switches and wireless access point devices; computer storage hardware; computer storage servers; computer storage area network (SAN) servers; computer network-attached storage (NAS) hardware; computer and computer communications hardware; storage area networks; disk drive backup hardware; disk drives; disk drive arrays and enclosures; redundant array of independent disks (RAID) controllers; host bus adapters; data storage systems comprising computer hardware, computer peripherals and operating system software; integrated IT systems comprising computer storage and networking hardware and software for converged infrastructure; modular IT systems comprising data processing apparatus, data storage modules, computer networking modules, power modules and internal computer cooling modules; computer peripherals; magnetic tape units for computers; blank media for storage of computer data; memory chips, namely, computer memories and computer memory hardware; semiconductors, printed circuit boards, integrated circuits; electronic components for computers; computer operating systems; computer operating systems, namely, computer software for operating computer hardware; network access server operating software; computer software for administration of computer networks; downloadable cloud computer software for use in cloud infrastructure management, data warehouse infrastructure management, database management and electronic storage of data; computer software for creating searchable databases of information and data; computer software for electronic storage of data; computer hardware and software for virtualization; computer software for configuration, provisioning, deployment, control, management and virtualization of computers, computer servers and data storage devices; software for computer network operation, management, automation and virtualization; computer

(WAN) operating software; computer software for connecting disparate computer systems, servers and storage devices; software for cloud infrastructure management and automation; computer software used for running cloud computing based applications; cloud computer software for use in enterprise applications, database management, and electronic storage of data; computer software for monitoring cloud, web and application performance; computer software for information technology (IT) management, IT infrastructure management, remote IT infrastructure management, IT asset management and inventory, IT process automation, IT device lifecycle management, IT security, IT reporting and forecasting, IT infrastructure fault and performance monitoring; computer software for managing IT service desk and IT help desk services; computer software for data protection and data security; computer software for providing security for computers, networks and electronic communications; computer network security software; computer software for monitoring computer network access and activity; computer software for assessing application security; data and document encryption and decryption software; cryptography software; computer user authentication software; software for information security compliance monitoring, reporting and analytics; IT security intelligence and risk management software; data backup, recovery and archiving software; computer software for data deduplication; database management software; computer software used to read and evaluate content located on global computer networks, databases and/or networks; computer software for application and database integration; data search software, namely, software for creating searchable database of data; computer search engine software; software for searching databases; computer software for creating searchable databases of information and data; computer data warehouse operation and automation software; data center operation and automation software; computer software for data transmission, storage, processing and reproduction; computer software for accessing, querying and analyzing information stored in databases and data warehouses; information and knowledge management software for knowledge capture and management; business intelligence software; computer software that provides real-time, integrated business management intelligence by combining information from various databases; business analytics software for collecting and analyzing data to facilitate business decision making; computer software for use in big data analysis; computer software that automates the processing of un-structured, semi-structured and structured information and data stored on computer networks and the Internet; software for business organization and business process virtualization and management; enterprise resource planning (ERP) software; software for business risk management; project portfolio management (PPM) software; records management software; computer e-commerce software to allow users to perform electronic business transactions via a global computer network; software development tools; computer software for computer system and application development, deployment and management; software development tools for the creation of mobile Internet applications and client interfaces; software development tools, namely, software for testing software applications; product lifecycle management software; software-defined infrastructure software, namely, software for virtualization; computer software that provides web-based access to applications and services through a web operating system or portal interface. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 016. US 002 005 022 023 029 037 038 050. G & S: Printed matter, namely, magazines, printed periodicals, books, newsletters, brochures and journals in the field of computers, computer software and information technology; printed instructional and teaching materials in the field of computers, computer software and information technology; brochures about technological developments; printed reference guides, technical bulletins in the field of computers and information technology; printed product operating and service guides for computers and computer peripherals. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 035. US 100 101 102. G & S: Business management; business administration; providing office functions; business management consulting services; business consulting services in the field of information technology (IT); business consultation services in the field of business process improvement and outsourcing; business consultation services in the field of enterprise architecture; IT outsourcing services; business process outsourcing; business strategic planning services in the field of information technology; asset management services, namely, reporting on service histories, utilization of the IT assets, end of product life information replacement costs all related to IT equipment; compilation and systemization of information into computer databases; database management services; online retail store services and ordering services featuring computer hardware, software and peripherals; business services, namely, assisting others in the negotiation and development of business partnerships and business alliances; marketing and promotional program services in the field of information and computer technology; customer relationship management services; business records management, namely, classification and organization of data for records management purposes; providing a website featuring an online marketplace for sellers and buyers of computer and IT goods and services; business knowledge management services; business data analysis; business risk management consultation. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 036. US 100 101 102. G & S: Insurance claims processing; insurance claims administration; insurance consultancy; insurance information; insurance services, namely, underwriting extended warranty contracts in the field of information technology; insurance services, namely, writing property insurance; financial affairs, monetary affairs, namely, financial information, management and analysis services; financing of purchases and lease-purchase financing; providing lease financing for IT equipment and computer software; providing credit card transaction processing services for others; providing insurance claim processing services for others; financial analysis and consultation services for the organization and administration of banking and financial operations; financial asset management; financial risk management consultation. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 037. US 100 103 106. G & S: Repair and installation of information technology (IT) equipment; installation, maintenance and repair of computers and computer, networking and telecommunications hardware. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 038. US 100 101 104. G & S: Telecommunications services, namely, transmission of voice, data, graphics, images, audio and video by means of telecommunications networks, wireless communication networks, the Internet; information transmission via electronic communications networks; providing secure real time electronic communication over a computer network; providing virtual private network services, namely, providing secure electronic communications over a private or public computer network; telecommunications consultation; providing online chat rooms, electronic bulletin boards and forums for transmission of messages among users in the fields of computers, software, information technology and general interest; streaming audio and video material on the Internet; voice over Internet protocol (VOIP) services; electronic transmission of data via global computer networks. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 041. US 100 101 107. G & S: Educational and training services, namely, conducting classes, workshops, seminars and conferences in the field of computers, software, and information technology; online journals, namely, blogs featuring information in the fields of computers, software, and information technology. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330

IC 042. US 100 101. G & S: Scientific research and development; research and development of new products for others; research and development of software; research and development in the field of information technology; design and development of computer hardware and software; computer systems analysis; planning, design and implementation of computer technologies for others; computer systems integration services; computer system administration for others; rental and leasing of computer hardware and computer peripherals; computer consulting services; computer consultation services, namely, advice on designing, selecting, and using computer hardware and systems; computer software consultancy; technological consultation in the field of selection, implementation and use of computer software; consulting services in the field of software as a service; Internet consulting services, namely, technical consulting services in the field of datacenter architecture, public and private cloud computing solutions, and evaluation and implementation of Internet technology and services; information technology (IT) consulting services; consulting in the field of and applications transformation, integration, modernization, migration, design, development, implementation, testing, optimization, operation and computer project management; consulting in the field of cloud computing and big data analytics; technical consulting services in the field of cloud infrastructure; technical consulting services in the fields of datacenter architecture, public and private cloud computing solutions, and evaluation and implementation of Internet technology and services; consulting in the field of development of security systems and contingency planning for information systems; consulting in the field of computer security; computer consultation in the field of computer data security; IT consulting in the nature of consulting in the field of IT mobility and workplace services; technological consultation in the technology field of unified communications hardware and software; IT consulting in the nature of consulting with respect to the IT aspects of business processes; IT consulting in the fields of customer relationship management, financial administration, human resources, payroll and document processing; consulting services in the field of computer-based information systems for businesses; computer consultation services in the field of application delivery management; computer consulting in the field of web marketing optimization applications; IT consulting in the field of converged IT systems; IT consulting in the fields of IT converged and hyper-converged IT infrastructure; IT consulting in the field of utility industry services and operations; IT consulting in the environmental and energy efficiency fields; scientific and technological services, namely, research and design in the field of computer networking hardware and computer datacenter architecture; technical consulting services in the field of datacenter architecture; providing temporary use of online non-downloadable temporary use of on-line non-downloadable cloud computing software for use in database management and electronic storage of data; computer hardware and software design and development; computer program

maintenance and update services; consulting services in the field of testing the operation and functional computers, computer networks and software; business technology software development and consultancy services; computer programming services for others in the field of software configuration management; updating and maintaining cloud-based computer software through on-line updates, enhancements and patches; computer technical support services, namely, help desk services for IT infrastructure, computer hardware, computer software, computer peripherals and computer networks; computer technical support services, namely, service desk services for IT infrastructure, operating systems, and business and web applications; technical support services, namely, troubleshooting of computer software problems; technical support services, namely, troubleshooting in the nature of diagnosing computer hardware and software problems; technical support services, namely, migration of datacenter, server and database applications; technical support services, namely, monitoring of computers, network systems, servers and web and database applications, and notification of related events and alerts; technical support services, namely, remote computer and network monitoring services; technical support services, namely, remote and on-site infrastructure management services for monitoring, administration, and management of public and private cloud computing IT and application systems; consulting services in the field of cloud computing; cloud hosting provider services; hosting software applications for others; cloud hosting of electronic databases; cloud computer infrastructure hosting services; computer services, namely, providing virtual and non-virtual application servers, web servers, file servers, redundancy servers, and database servers of variable capacity to others; rental of computing and data storage facilities of variable capacity, namely, virtual and non-virtual application servers, web servers, file servers, redundancy servers, and database servers, to third parties; computer infrastructure hosting services, namely, providing computer hardware, computer software, computer peripherals to others on a subscription or pay-per-use basis; providing virtual computer systems and virtual computer environments through cloud computing; computer services, namely, integration of private and cloud computing environments; computer services, namely, remote and on-site management of information technology (IT) systems and software applications for others; cloud computing featuring software for use in database management; database development services; rental of space in a computer co-location facility; containerized data centers of others; data mining services; data backup and data restoration services; data migration services; data encryption and decryption services; cloud computing featuring software for use in database management and data warehousing; electronic data storage; Infrastructure-as-a-service in the nature of technical support services, namely, remote and on-site infrastructure management services for monitoring, administration and management of public and private cloud computing IT and application systems; temporary use of non-downloadable software for computer and network operation, management, automation, virtualization, configuration, provisioning, deployment, and control; temporary use of non-downloadable software for information technology (IT) management, IT infrastructure management, remote IT infrastructure management, IT asset management and inventory, IT process automation, IT device lifecycle management, security, IT reporting and forecasting, IT infrastructure fault and performance monitoring, and facilitating user service desk and help desk functions; temporary use of non-downloadable software for data protection, data security, and computer application and network security; temporary use of non-downloadable software for information security regulatory compliance; temporary use of non-downloadable software for monitoring computer network access and activity; temporary use of non-downloadable software for data encryption, decryption, cryptography, computer user authentication, and information security compliance monitoring, reporting and analytics; temporary use of non-downloadable software for data backup, recovery, archiving, deduplication; temporary use of non-downloadable software for cloud infrastructure management and automation; temporary use of non-downloadable software for cloud, web and application performance monitoring; temporary use of non-downloadable software for database and database management, data warehouse operation and automation, data center operation and automation, application and database integration, data transmission, storage, processing and reproduction, and for accessing, querying and analyzing information stored in databases and data warehouses; temporary use of non-downloadable software for business intelligence, business process insight, data analytics, information management, knowledge management, customer relationship management, and enterprise resource and risk management; temporary use of non-downloadable software for storing, managing, tracking, and analyzing business data; temporary use of non-downloadable search engine software and software for project and records management; temporary use of non-downloadable software for software development, deployment, testing, delivery and application lifecycle management; temporary use of non-downloadable software for converged systems management; temporary use of non-downloadable software-defined infrastructure software for virtualizing and managing computers, computer hardware, computer software, servers, computer networks and data storage; temporary use of non-downloadable software in fields of converged and hyper-converged infrastructure for virtualizing and managing computers, computer hardware, computer software, servers, computer networks and data storage; Software as a Service services, namely, hosting cloud and database information systems for others; software as a service, namely, providing software as a service for others.

text, video and audio data; file sharing services, namely, providing a website featuring technology enabling users to upload and download electronic files. FIRST USE: 20170330. FIRST USE IN COMMERCE: 20170330
