Atrius Insights -

Space Utilization

Atrius Spaces - Web-based

Enhance mobile applications with accurate wayfinding, point of interest search and location-based interactions.

Optimize workflows, space layouts and equipment utilization, with precise item location, pathing and customizable alert monitoring.

Web-based Dashboard and APIs

Transforms location-based services into a web-based analytics dashboard, making complex spatial relationships understandable and actionable for your business.

Application and APIs

Analyze and plan for your spatial requirements across building or campus portfolios.

[LEARN MORE](#)

Lighting Enables IoT

A scalable, ubiquitous infrastructure, powering communication technologies. Gain contextual, location-aware data, plus connectivity to those who matter to your business.

Right Connection

Embedded power, connectivity, data and location

Right Location

Everywhere there are people, there are lights

Right Time

Immediate energy saving opportunities

The IoT Platform For Your Business

Leveraging Your Connected Building

Sensory Network

Embedded connectivity to leverage location and building data

Software Services

Enable the development of mobile and web-based applications and reveal thorough analytics

Partners

Expertly deliver tailored solutions for your business

Solutions for Your Business

Promoting strategic engagement, process improvements and new revenue opportunities
