**EXHIBIT C**

## Here's how Specialty Expedite works

### Send eRx to CVS Specialty

Health care provider submits eRx from EHR.

### Patient Welcome

Patients receive a welcome video so they know we received their prescription and what to expect along the way.

### CVS Specialty Begins PA

Just like how health care professionals exchange patient information between EHR systems, we are able to gather the relevant patient information directly from your EHR to process the prior authorization. If the patient's plan allows, we'll submit it to them on your behalf. And we will also see if your patients are eligible for copay assistance.

### Patient Alerts and Updates

Patient is no longer in the dark wondering about the status of their medication. They are kept informed along the way.

These messages include:

- Welcome to CVS Specialty
- Prescription request received
- Benefits verification status (eg, prior authorization, insurance approval)
- Order shipped

Patients will also receive refill reminders and more.

## Experience the benefits

**Reduces paperwork, faxes, frustration, and errors associated with prior authorizations (PA)**

No more following up and submitting patient information by fax or phone, which can cause errors and delays.

**No more Rx status confusion or guesswork**

Your patients\* are kept up-to-date on the status of the specialty prescription every step of the way.

\*Patients receive real-time prescription status updates only after providing consent to CVS Specialty®.
