Automatically Detect & Size Polyps in Real-Time During a Colonoscopy Prodecure

Argus™

Artificial Intelligence & Machine Learning

Clinical Decision Support Software (CDSS)*

Enhance GI Procedure Accuracy with Argus Artificial Intelligence and Machine learning. This vendor neutral technology allows the utilization of current processors and is independent of EMRs.

*Argus is a clinical decision support software (CDSS). It is not intended to substitute for the advice of a clinician. The clinician should always use proper judgement while taking care of the patient and should disregard Argus recommendations if it seems clinically inappropriate.
