## The leading innovator in 3D motion tracking technology.

Xsens is the leading innovator in 3D motion tracking technology and products. Its sensor fusion technologies enable a seamless interaction between the physical and the digital world in consumer devices and professional applications such as 3D character animation, motion analysis, and industrial control & stabilization.

### NEW: MTi 600-series

The NEW Xsens MTi 600-series sets the standard for industrial-grade...

### 3D Character Animation

Xsens motion capture solutions are unmatched in ease-of-use, robustness and...

### Human Motion Measurement

Xsens motion analysis technology is available in full-body 3D kinematics...

### Inertial Sensor Modules

Xsens supplies MEMS based inertial measurement units (IMU, VRU, AHRS and...

#### Xsens

- Inertial Sensor Modules
- 3D Character Animation
- Human Motion Measurement

Motion capture, Movement Analysis, Gait analysis, AHRS, IMU, Inertial sensors, Human Machine Interaction, Wearable Technology, Accelerometers, Gyroscopes, Sports Biomechanics, Precision Agriculture, Ergonomics and Human factors, GNSS/INS, Informing Musculoskeletal models

#### Products

- MTi-1 series
- MTi-100 series
- MTw Awinda
- Xsens MVN Analyze
- MTi-10 series
- MTi-600 series
- Xsens MVN Animate
