Description

There's nothing more personal than fragrance—you want yours to enhance individuality. That's why it was important to us to make sure Tease creates a unique signature on each woman who wears it. We started with gardenia petals spiked with Black Vanilla. The unexpected bite of Frozen Pear. A touch of Sandalwood. Warm yet fresh, the notes amplify in reaction to your body heat, so the fragrance blooms on skin. It's instantly addictive. And totally you.
