### Tiered Access for Users

SCDMS allows you to set tiered levels of access for Users so that you can protect information and authorize specific permissions for your team. The Administrator Dashboard enables User Access and Document Control.

### Easy To Use

The easy Click-Friendly platform and clean interface makes for a convenient user experience that requires minimal training. The SCDMS™ support team is here to guide you!

### Powerful Search, Cable Categories

Key Word Search through thousands of pages in seconds in SCDMS™ Your many files are sorted for easy access. Files are categorized into an Intuitive Submarine Cable Folder Structure: Choose from a Pre-Set Standard Structure or Custom Service

### We Will Upload Your Entire Cable Library

The SCDMS™ Support Team is available to upload your cable documents for you! Request our LEGACY SERVICE - have your entire cable document library uploaded for you. Includes scanning paper documents and DVDs, CDs and more. SUBSCRIBE today and we can tailor a custom plan to meet your business needs.

### Disaster Recovery

Fires, cable breaks, fishing dredges, weather-related emergencies, accidents - both from natural and human causes - can cause millions of dollars in damage. Have your original "As Built/As Laid" charts accessible at the touch of a button. Not having quick access creates costly delays. SCDMS™ creates efficiency, saves money and time.

### Upload All Cable File Types

SCDMS™ is built specifically to manage all of the file types required for submarine cable documentation - including crossing agreements, spares inventory and inventory control, current day site inspections, evaluations and trouble ticket storage and control docs, operation, install, maintenance & repair logs, spreadsheets, meeting minutes, maps, photos, and more!

### Remote Access Around the Globe

SCDMS™ resides in a secure cloud environment to ensure the convenience of remote access to your documentation.

### NIST SP 800-171 Compliant

SCDMS™ is DFARS/NIST SP 800-171 compliant and conforms to federal standards for the handling of Controlled Unclassified Information (CUI). These additional layers of security provide extra protection for your data.

### 24/7 Monitoring

SCDMS is monitored by a highly-trained, Independent Security Operations Center (SOC) to ensure the safety of the SCDMS system.
