

# Exhibit A

### Protecting your devices, data, and privacy.

In 2004, Lookout founders John Hering, Kevin Mahaffey, and James Burgess discovered a security vulnerability involving Bluetooth signals and Nokia mobile phones. When Nokia downplayed the significance of the security hole, the three of them took action.

They created the Blue Sniper, a gun-shaped microphone that could pull in Bluetooth signals from 1.2 miles away. Hering and Mahaffey then pointed their gun at the 2005 Academy Awards, hearing sensitive phone data from hundreds of movie stars to illustrate the importance of mobile security. They happened upon a team from the New York Times, who brought our story to the world.

Ever since, Lookout has taken a mobile-first approach to security. Today, Lookout protects mobility for some of the world's largest enterprises, critical government agencies, and tens of millions of individuals worldwide. We've achieved this by partnering with leaders in the mobile ecosystem globally, and we're only getting started.

At Lookout, we're laser-focused on creating mobile-first, cloud-first products not just for IT administrators and CISOs, but individuals as well. The promise of secure mobility is now a reality—the basis for trust in a world without data borders.

RECENT AWARD

#### Forbes Cloud 100

Lookout is proud to be included on the Forbes 2016 Cloud 100 list. The list is produced by Forbes in collaboration with Bessemer Venture Partners and Salesforce Ventures and features the top 100 companies leading the cloud technology revolution worldwide.

# Securing the post-perimeter world.

Lookout post-perimeter security enables you to put the trust in zero trust by establishing continuous conditional access to data based on risk.

[LEARN MORE](#)

## How to secure the post-perimeter world

The post-perimeter world requires organizations to move their endpoints to the world and their devices access corporate data from cloud services outside of traditional security protections. Securing data in the post-perimeter world requires organizations to move critical security capabilities to endpoints, and establish continuous conditional access to data based on risk.

**"Gartner predicts that 80% of worker tasks will take place on a mobile device by 2020."**

Source: Research by Gartner, "Endpoint Management in the Enterprise 2017-2021," June 2017

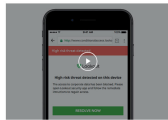

## Post-perimeter security is the new architecture

Each element of post-perimeter security works together to enable enterprises to protect data from threat and risk present on endpoints. Through continuous conditional access, it enables enterprises to continuously assess device health and allow employees to continue to work across any network. This enables access to all of your organization's endpoints while protecting employee privacy.

## How Lookout enables post-perimeter security

Lookout enables post-perimeter security by monitoring risk at the endpoint, including phishing threats, to provide continuous conditional access to corporate resources. This happens only when there is an acceptable level of risk, and the device is in compliance with policy.

REPORT

### Learn how Lookout puts the trust in zero trust

Read this report to gain an in-depth look at how the new security architecture is set up and what enterprises can do to implement it in multiple dimensions.

[DOWNLOAD REPORT](#)

"Securing mobile endpoints is definitely a priority for us. We see Lookout as a critical layer of protection, both to prevent compromise of our corporate data, and to maintain compliance with all privacy laws."

Christie Jack, Network Administrator, Simon Vigore

### Phishing: Myths and facts facing every modern enterprise today

Phishing is the biggest cybersecurity challenge enterprises face today. Phishing is evolving as the mobile device provides new vectors for attack including SMS, social media apps, emerging apps, and readily available access to email. As a result, mobile users are three times more likely to fall for phishing scams, according to Sift.

[LEARN MORE](#)

### Understanding the Full Spectrum of Mobile Risk

In order to ensure comprehensive security across all employee endpoints, enterprises must first understand the Spectrum of Mobile Risk. This, in conjunction with the Mobile Risk Matrix, is a framework security leaders can use to determine the complete attack vectors and components associated with a mobile device.

## Lookout Class 9 Screenshot.

All-in-one protection means it's never been easier to stay safe and secure.

**Predictive Security**

Lookout's advanced security connects the dots between code, app behavior, and known attackers to stop threats - all in the cloud without impacting your device.

**Theft Alerts**

Lookout turns your device's features - from the front-facing camera to the lock screen - into defensive countermeasures that make thieves think twice.

**Missing Device**

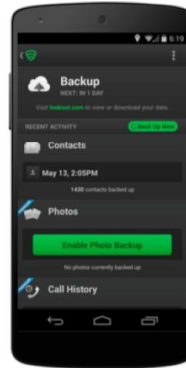

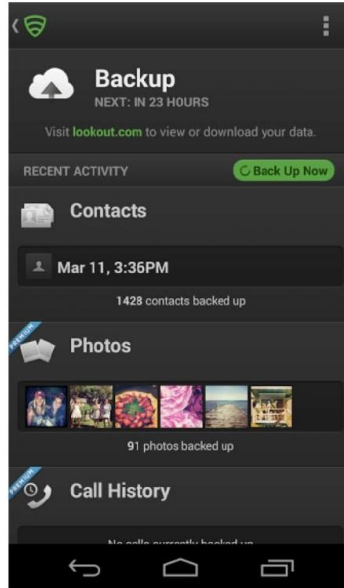

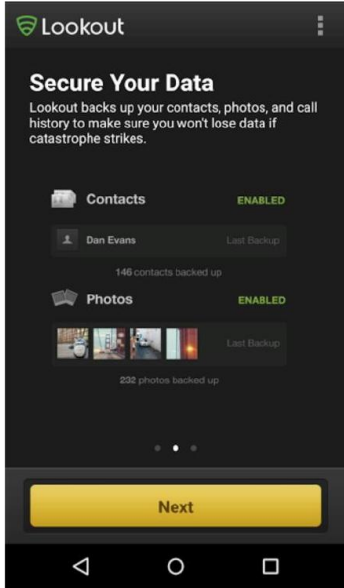

Forget that panicked feeling when you can't find your smartphone. Lookout gives you the control you need to get your lost or stolen device back.

**Data Backup**

Losing or damaging your device doesn't have to mean losing what's on it. Automatic backups of your contacts, photos, and call history make sure they're always up-to-date.

Google Play      App Store

- Class 38: 4 screen shots that show how customers can access archived data related to their phone and/or its functionality
- Class 39: 4 screen shots that show Lookout stores and archives user data

**Protect Your Pictures and Personal Data**

# Exhibit E

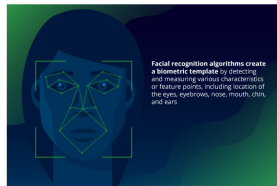

**Biometrics Technology**

- Fingerprint Recognition
- Facial Recognition**
- Voice Authentication
- Iris Recognition
- Biometric Liveness Detection and Spoof Detection
- Automated Biometric Identification Systems (ABIS)
- Biometric-as-a-Service (BaaS)
- Mobile Biometric Authentication
- Browser-Based Biometrics

**Facial Recognition**

Biometrics make use of our most unique physical features and behaviors to serve as digital identifiers that computers and software can interpret and utilize for identity-related applications. They can be used to identify someone in a biometric database, or to verify the authenticity of a claimed identity.

Facial recognition technology applies the science of biometrics to a user based on his or her facial features. Facial recognition algorithms create a biometric template by detecting and measuring various characteristics or feature points, including location of the eyes, eyebrows, nose, mouth, chin, and ears. Two templates are compared to yield a match score, which indicates the likelihood that the two images belong to the same person. Liveness detection may also be applied to ensure that the source of the biometric sample is not a digital or paper reproduction.

Law enforcement agencies such as the FBI use facial recognition technology to search criminal watch lists and help conclusively identify a person of interest. They can search a recently taken photo or video against a database of existing photos to help identify that person. Governments around the world use facial for biometric identification for a variety of applications including border security, fraud prevention, and citizen ID.

More recently, mobile authentication has emerged as the most common main private-sector use case for facial biometrics, where our facial images can be used in place of a password. Users can now log onto their devices using facial recognition as a convenient and secure alternative to PINs and passwords. Incorporating facial recognition into mobile apps, such as for banking or other secure applications, allows the app provider to have more control of the security features and user experience, and also achieve more consistency across customer devices.

**Facial recognition's advantages**

Each biometric modality offers advantages and disadvantages. Facial recognition offers several advantages over other biometrics:

1. **Proliferation of digital facial image data:** The billions of existing digital facial images from countless sources are extremely useful for algorithm training purposes, particularly for algorithms using machine learning techniques.
2. **Enhancement of manual facial recognition:** Biometrics can be used in concert with human visual facial recognition processes, such as comparing a live person to their facial image on their ID card. Facial recognition technology can be used to automate or enhance this process and provides greater matching accuracy. For just about any process where a person's face is used by a human to verify their identity, biometrics can be used to improve it.
3. **Ubiquity of cameras on mobile devices:** Nearly all smartphones, tablets, and laptops have built-in front-facing cameras that enable high-quality "selfie" shots. This makes it convenient to collect a live facial recognition sample for comparison against a template.
4. **Conducive to use with other modalities for mobile authentication:** Facial image capture using the front-facing camera on a phone can be performed passively and simultaneously during capture of other modalities such as voice and keystroke to improve matching performance and liveness detection.

**Facial recognition's challenges**

The following challenges must be addressed for facial recognition to be useful:

1. Wide variety of environmental capture conditions (e.g. lighting, shadows) make accurate matching more challenging. Pose variations, aging, glasses, facial expressions, and facial hair can also make matching more difficult. Differences between camera sensors and settings can also have an impact.
2. High availability of facial images means fraudsters can more easily obtain images of potential fraud victims that can be used for spoofing.

**Overcoming the challenges**

Several steps can be taken to optimize security, performance, and user experience.

**Automate capture of high-quality images**

Software that automates capture of facial images analyzes the streaming video frames in real time. Image capture is automatically triggered once focus, facial positioning, lighting, and other image capture details are verified for compliance with quality standards.

The image is analyzed again and optimized post-capture. Automatic scaling, rotation, cropping, brightness, and contrast enhancements optimize the quality of an otherwise non-compliant image so the photo doesn't have to be retaken.

**Perform robust liveness detection**

Fraudsters may attempt to spoof a facial recognition algorithm with non-live digital videos and images obtained online. Liveness detection algorithms distinguish between a printed, digital, video, and a live facial image.

Passive liveness detection looks for indicators of a non-live image such as inconsistent features between foreground and background.

Active liveness detection prompts the user to blink or shake his or her head to ascertain liveness.

The combination of active and passive methods will yield the highest performance matching. Facial recognition analysis applications might also leverage a second modality such as voice to help assure liveness.

**Use high-performance algorithms**

In the past few years, machine learning algorithms have become the predominant method for automatically extracting the above information and then comparing it against other images.

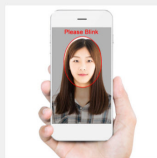

**Aware's facial recognition products**

Aware products for facial recognition:

- **KnowBe:** Mobile authentication with facial matching and liveness detection.
- **ProFace:** Face image capture and processing on mobile device or desktop.
- **NeoFace:** Face matching algorithm SDK.
- **FaceWorkBeats:** Forensic examiner workstation application.

Director of the United States Patent and Trademark Office

**REQUIREMENTS TO MAINTAIN YOUR FEDERAL  
TRADEMARK REGISTRATION**

**WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE  
DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.**

**Requirements in the First Ten Years\***

**What and When to File:**

***First Filing Deadline:*** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. *See* 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.

***Second Filing Deadline:*** You must file a Declaration of Use (or Excusable Nonuse) **and** an Application for Renewal between the 9th and 10th years after the registration date.\*  
*See* 15 U.S.C. §1059.

**Requirements in Successive Ten-Year Periods\***

**What and When to File:**

You must file a Declaration of Use (or Excusable Nonuse) **and** an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.\*

**Grace Period Filings\***

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

**The United States Patent and Trademark Office (USPTO) will NOT send you any future notice or  
reminder of these filing requirements.**

**\*ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the USPTO. The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. *See* 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. *See* 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

**NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.**

Director of the United States  
Patent and Trademark Office

**REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION**  
**WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE**  
**DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.**

**Requirements in the First Ten Years\***

**What and When to File:**

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.\* See 15 U.S.C. §1059.

**Requirements in Successive Ten-Year Periods\***

**What and When to File:**

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.\*

**Grace Period Filings\***

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

**\*ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

**NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.**

**NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.**

COLLEEN MULCRONE, EXAMINING ATTORNEY

*Michelle K. Lee*

Director of the United States  
Patent and Trademark Office

**REQUIREMENTS TO MAINTAIN YOUR FEDERAL  
TRADEMARK REGISTRATION**

**WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE  
DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.**

**Requirements in the First Ten Years\***

**What and When to File:**

***First Filing Deadline:*** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.

***Second Filing Deadline:*** You must file a Declaration of Use (or Excusable Nonuse) **and** an Application for Renewal between the 9th and 10th years after the registration date.\* See 15 U.S.C. §1059.

**Requirements in Successive Ten-Year Periods\***

**What and When to File:**

You must file a Declaration of Use (or Excusable Nonuse) **and** an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.\*

**Grace Period Filings\***

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

**\*ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

**NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.**

**NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.**
