Unsere Blutentnahme-Zeiten

Montag-Freitag 07:30 – 17:45 Uhr

Samstag 07:30 – 11:30 Uhr

GERMAN - DETECTED ENGLISH SPANISH FRENCH V PROBLEM SPANISH ARABIC V

Wir bieten Ihnen während unserer Öffnungszeiten ohne Voranmeldung ambulante Blutentnahmen an. Dabei sind eine Vielzahl von medizinischen Analysen möglich, wie zum Beispiel Labor-Check-up-Analysen, Vitaminbestimmungen, Hepatitis, HIV-Test (Aids-Test). Bei Fragen stehen Ihnen unsere Spezialisten gerne zur Verfügung. Kommen Sie im Auftrag Ihres Arztes, bitten wir Sie, das vollständig ausgefüllte Auftragsformular mit Arztstempel und sämtlichen benötigten Angaben mitzubringen.

Für alle Untersuchungen gewährleisten wir Ihnen vollständige Anonymität und Vertraulichkeit.

Sämtliche Analysen, die ohne ärztlichen Auftrag durchgeführt werden, können nur gegen Bar- resp. Kreditkartenzahlung durchgeführt werden. Die Befunde werden per Post oder E-Mail versandt. Beratung

Vor der Durchführung von Analysen steht Ihnen unser medizinisches Beraterteam zur Verfügung. Dieser Service ist kostenfrei. Bitte sind Sie sich bewusst, dass diese Beratung nicht den Arztbesuch ersetzt. Es werden keine Therapieempfehlungen, Impfungen sowie Rezeptausstellungen durchgeführt.

Wichtig: Für den Oralen Glukosetoleranz-Test (OGTT) bitte morgens bis 9:00 im Labor sein, am Samstag bis spätestens um 8:30.

During our opening hours, we offer you outpatient blood collections without prior notice. A variety of medical analyzes are possible, such as laboratory check-up analyzes, vitamin determinations, hepatitis, HIV test (Aids test). If you have any questions, our specialists are at your disposal.

If you are on the order of your doctor, we kindly ask you to bring the completed form with the doctor's stamp and all the required information.

For all examinations we guarantee complete anonymity and confidentiality.

All analyzes that are carried out without a medical order can only be carried out against cash resp. Credit card payment to be made. The findings will be sent by post or e-mail.

consultation

Before carrying out any analyzes, our medical advisory team is at your disposal. This service is free. Please be aware that this advice does not replace the doctor's visit. No therapy recommendations, vaccinations and prescription exhibitions are carried out.

Important: For the Oral Glucose Tolerance Test (OGTT), please be in the lab until 9:00 am, and no later than 8:30 am on Saturday.

Between physical medical samples and drop-in services, medica is involved in geographically local services. **VRG** is not involved in the use of any similar medical samples (e.g., blood or other bodily fluids) used for a vast range of clinical diagnostics services offered by **medica**.

Company history that shows a focus on medical/clinical laboratory diagnostics / business. Note that **medica** acquired **Institut Virion AG** in 2013.

This reinforces the notion of a high-level focus of <u>clinical</u> chemistry and microbiology. Physicians and typical medical areas (immunology, infections, epidemiology, serology/blood serum) and services for humans and animals is different than computer simulations of atomic level data. VRG does not work with blood or other samples. I personally don't own a test tube or beaker and our primary work will be done via computer simulations and algorithmic analyses.

Translation of other **medica** website information shows **medica** is involved in both human and animal medical diagnostics in the following medical areas: dermatology, genetics (e.g., testing for breast cancer risk factors), hepatitis, mosquito-borne illnesses (e.g., zika, malaria, West Nile, dengue), allergy, gynecology, veterinary, and a huge range of other microbiology based testing (see their sample forms). An impressive comprehensive set of medical diagnostics. Note that **medica** offers multiple diagnostic tests for viruses.

Medica appears to be an umbrella corporation for many diagnostics laboratories, geographically based in Zürich, Switzerland. It is unclear if samples are primarily from local or nearby European countries.
