Color: 70Telesocpe

- 400mm focal length telescope (f/5.7), fully coated optical glass with high transmission coatings creates stunning images with increased brightness and clarity. Perfect telescope excels at daytime birding use as well as viewing wildlife, scenery and casual nighttime observing of the Moon and bright planets for entry-level amateur astronomers and beginners kids.
- This telescope is quick and easy to set up even for the novice and will encourage kids to love learning about space, great holiday or birthday gift idea for kids who love science and astronomy!
- Grab-and-go day and night refractor telescope and lightweight adjustable aluminum tripod, specially designed backpack holds the 70mm telescope, tripod and all accessories inside the bag for young stargazers and families easy traveling and on-the-go stargazing.
- Includes 5x24 finder scope with mounting bracket, for easy aiming and two 1.25" telescope eyepieces (K20mm and K9mm) for 20-power and 44-power views. Also comes with a 3x Barlow lens increase viewing power, erect-image diagonal, make locating objects easily.
- Reliable and friendly customer service, if you have any questions, please contact us at any time. LIFETIME WARRANTY GUARANTEE,
 LIFETIME MONEY BACK GUARANTEE
