

## EXHIBITS:

Exhibit 1: Fluid Energy Group LTD website:

The screenshot shows the Fluid Energy Group LTD website. At the top left is a menu icon with the word "MENU" below it. In the center is the Fluid Energy Group LTD logo, which consists of the word "Fluid" in a bold, sans-serif font with a stylized wave above the 'i', and "ENERGY GROUP LTD." in a smaller font below it. Below the logo is a grey horizontal bar with the text "ABOUT FLUID" in large, bold, black letters, and the Latin phrase "A mari usque ad mare" in a smaller font below it. The main content area has a white background with a decorative green and blue abstract graphic on the left side. The text in the center reads: "Fluid Energy Group is *CHEMICAL EVOLUTION™*" followed by "Fluid manufactures environmentally responsible, low-hazard and technically advanced chemical systems" in bold. Below this is the tagline "Efficient / Responsible / Effective" and "chemistry alternatives for the oil & gas industry". At the bottom of the page is a dark blue and green abstract graphic.

Exhibit 2. Hydraulic fracturing:

# PRODUCT SPECIFICATION SHEET

**PRODUCT:** CSR Plus™

**MANUFACTURER:** Blue Earth Labs 14580 West 99<sup>th</sup> Street, Lenexa, KS 66215 Phone: 1.800.259.4472

**BENEFITS:** CSR Plus is a more aggressive cleaner of scaled concrete or painted steel surfaces and is less corrosive than most acidic descalers. Discharge of runoffs is facilitated by pH-triggered color change. Cleaning air stripper media with CSR Plus is an alternative to costly media replacement.

**DESCRIPTION:** CSR Plus is a liquid descaling product for removal of heavy calcium carbonate and other mineral deposits from filtration basins, troughs, clarifiers and other accessible water treatment plant surfaces. CSR Plus is also used to clean air stripper media or as an off-line pipeline treatment. CSR Plus is not a potable water treatment product and therefore cannot be injected into potable water.

**PROPERTIES:**

Composition	Proprietary Hydrochloric Acid Blend
Weight	1.07 kg/L
Color	Yellow

**REFER TO MSDS SECTION 13  
for detailed information**

Odor	Moderate Odor
pH	<1.0

**APPLICATION:** CSR Plus is sprayed on in undiluted form or diluted for soaking or circulation. The product can be applied straight or mixed with Floran Catalyst® at 50:1 to 10:1 ratio. The mixture has to be used immediately and leftover mixed product should be disposed of immediately after use in order to prevent heavy foaming. All spraying equipment should be rinsed after each use. For air stripper media cleaning, call for instructions. CSR Plus changes color when its activity declines.

**STORAGE:** CSR Plus and Floran Catalyst are stored separately. Do not store mixed product, it will become unstable. CSR Plus can be stored for 12 months in a ventilated, covered location. Floran Catalyst is stable for 6 months when protected from heat and direct sunlight.

**DISPOSAL:** Runoff generated during the cleaning procedure and leftover chemical can be neutralized with caustic soda and discharged to the sewer or a sludge lagoon. Specific local disposal requirements may apply.

**SAFETY:** CSR Plus is NSF certified for cleaning of drinking water facilities. The product is corrosive. CSR Plus is compatible with most surfaces found in water treatment and storage facilities.

**NSF/ANSI:** Standard 60 Certified

**WARNING:** DO NOT mix with bleach or other chlorine-based products to avoid formation of chlorine gas. Use or dispose of mixed product. Handle all Blue Earth Labs™ products according to Safety Data Sheets.
