

How It Works

Our case acceptance protocol. Previews compel patients to action.

Ask

Ask all your patients what they would change about their smile. Write down the shade of their anterior teeth.

Preview

Take one photo with a high quality camera or smartphone. Upload and select treatment options in one minute. Receive your preview package in one hour.

Close!

Show your patient the value of their treatment. Close the case when the patient sees what their smile could look like.

Fast Turnaround

Get your preview back in an hour. Present your case while still on the top of your patient's mind. It'll be hard to resist.

Expert Quality

Each preview is hand-crafted by a first-class team of digital artists. You have a vision, we see it too. Show your patients your vision.

Easy to Use

Nothing to install or learn. Simply take a quality photo of your patient, describe your treatment, or choose from preset treatment options.

Powerful Previews

Getting to "yes" has never been so easy. Previews can separate those who might from those that do. Nothing will be as compelling.

Deliver Winning Treatment Plans

SmileSIM™ customers have doubled their case acceptance!
