Synth Riders

★★★★★ 31 Ratings

Synth Riders is a challenging VR rhythm game where a player must hit different colored notes and note streams that fly by on either side of them. Each note is a 3D sphere that zooms by on the beat of the pulsating retro synthesizer music. Blue notes must be hit with the left hand, pink notes must be hit with the right hand, green notes must be hit with one hand only (either right or left) and orange notes must be hit with both hands at the same time. There are four levels of difficulty: easy, medium, hard and expert.

One Of The Best!

Absolutely fantastic rhythm game that brings something very special to the table. High levels of style and polish really put this game high on my list of top 3 all time VR rhythm games (others being Beat Saber and Audica). If you're a fan of rhythm games (or if you've never played and want to experience music in a new way) buy this - even if you own BeatSaber. It doesn't disappoint.

The developers are constantly listening to feedback and pushing out free new content. Between that and the amazing community behind it making mods and custom maps, the game has many hundreds of hours of play ready (my main play time is on my Oculus account, so don't go by the Steam one here)

TL;DR An amazing, unique rhythm game that offers something no other rhythm game does and with a level of polish rarely seen in VR games and... it keeps getting better!

Nice and intense

In order, I went from Audica to Beatsaber to this... amount of sweat produced this game wins.

Updating my review since the recent updates. The song list has expanded! The maps from the old songs are more polished here and there. New difficulties are unlocked, new mods to

change it up and add more challenge, cross play leaderboards, leaderboards by difficulty sorting, in game stat tracking including calorie counter, different punch style choices... amazing! This game topped my list before and now it stands even taller. Conversations on Discord changed to realities in game play and very well executed. Thank you very much for bringing this delight to the VR world. Bravo!

Synth Riders puts Beat Saber to shame...

... especially the music selections! What a great selection of synthwave tunes and cyberpunk visuals. Gameplay is awesome and worth the full retail price. Tons of replay value. Keep going dev, this could be the next big VR music game! Maybe see if you could license some DLC from Sung, Perturbator, Volkor X, FM-84, MAVS, Wojciech Golczewski, or The Midnight?

Very fun game with great music.

I have had a blast with this game. It is different enough from beat saber and also has that same addictive gameplay. Graphic and Effects are cool also has 5-6 different levels to choose from. I wish the stage you are standing on had more stuff going on.

My only complaint would be when you are selecting a song to play you cannot see your highest score unless you click on the different tab on high score area. So you cant see what you are trying to beat without clicking on another tab. please show your personal high score on main music page.

Otherwise I suggest this game to anyone wanting a cool music game.
