New MEP Software for Mechanical Contractors is First Offering from Applied Software Spin-Off

NEWS PROVIDED BY

Applied Software →

Aug 28, 2018, 08:00 ET

AUSTIN, Texas, Aug. 28, 2018 /PRNewswire/ -- eVolve, a revolutionary new product leader in the MEP industry, announced today the launch of eVolve Mechanical, a software solution built with the mechanical contractor in mind for better efficiency. eVolve Mechanical enables all skilled detailers to work together on the same file set for true collaboration. Using model-linked data, MEP systems automatically adjust and stay connected through all phases of collaboration.

eVolve is a new sister company to Applied Software, one of the largest AEC, Construction, Fabrication and Manufacturing Systems Integrators in North America. The announcement of the new company, which is focused exclusively on the eVolve technology originally created by Applied Software to improve the electrical prefab deliverable, was made today at the MEP Force conference in Austin, Texas.

"As technology that dramatically accelerates the process of creating prefab deliverables, our eVolve solutions continue to rise in popularity in the MEP industry," said Clay Smith, president of eVolve. "With the creation of eVolve Mechanical, we've taken the idea of workflows being a true solution and not just a workaround to heart. Our goal with the new company is to continually evolve our MEP software for even greater levels of productivity and efficiency."

evolve is currently available as an annual subscription. For more information about the new company and its technology, go to evolvemep.com.

About eVolve

eVolve has revolutionized the prefabrication workflow to dramatically accelerate the process of creating prefab deliverables to your business. We not only have developed a highly desirable platform to facilitate prefabrication, we also understand the unique needs and nuances within the MEP world. We offer a smooth transition from AutoCAD to Revit and our "just-in-time" environment reduces your overhead while increasing your productivity. Partnered with Applied Software, one of the largest AEC, Construction, Fabrication and Manufacturing Systems Integrator in North America, we have created a tremendous breakthrough solution to meet the demands of the MEP prefabrication market.
