About

We are WellSpan Health

Every day across central Pennsylvania, the people of WellSpan Health work together to support this non-profit mission of service—one patient, one community, one unique health care need at a time. We also collaborate with community leaders, area residents and other health care providers to make sure that inpatient, outpatient, home health and physician services are located where they can do the most good for our neighbors.

WellSpan: One Patient, One Community, ... Watch later Share

Working as One to make a difference

Focusing on the health of the community has inspired us to transform the way we work. We make it as simple as possible for individuals to develop a relationship with our health system and to become healthy and stay that way. Each patient's information is available to providers at any WellSpan location through our sophisticated electronic health record, and their care is coordinated by teams of physicians, health coaches, social workers and other professionals. This is, we believe, the best way to improve health across our growing, diverse region.

Our Mission

Working as one to improve health through exceptional care for all, lifelong wellness and healthy communities.

About Us

At Horizon, we define our success by a different set of numbers: the number of lives touched, the number of lives changed, the number of lives saved.

As we build a growing pipeline and explore all potential uses for our medicines, we strive to make a powerful difference for our patients, their caregivers and physicians every day.

Our drive to deliver breakthrough therapies comes from our deep understanding of the patient journey. These patients' courage inspires us – and drives us to listen, collaborate and build communities. That's why, at our core, we believe science and compassion must work together to transform lives.

Our History

Founded in 2008 as a startup with only a handful of employees and no office space, Horizon now has over 1,000 employees focused on helping those impacted by rare and rheumatic conditions. Though we've grown, our culture is no different today than it was when we started. We remain personally invested in the lives of people our medicines help wherever they are in their journey, from diagnosis through ongoing care.
