GLOBAL SOLUTIONS FOR THE POWER INDUSTRY

Stork has a legacy spanning 150 years in designing, manufacturing and installing business-critical equipment and materials, ranging from pumps, pipes, gearboxes and turbine blades to deaerators, boilers & burners and complete power-generating installations.

We combine high-quality product engineering with independent provision of in-depth asset integrity management. Stork can supply OEM equipment to EPC, provide custom-built machines based on the clients' specific requirements, and replace obsolete machines with new and improved designs.
