

The following remarks are in response to the Office Action dated May 24, 2019.

**AMENDMENT**

**I. IDENTIFICATION OF GOODS AND SERVICES**

Please amend the identification of goods and services to read as follows:

Intelligent water valves for plumbing pipes, namely, water-pipe valves of metal, in Class 6;

Thermostats, smoke detectors, digital weather station instruments, rain sensors being electric sensors, electric light dimmers, electric light switches, water leak detectors for water heater tank and piping, solar panels for power generation, charging stations for electric vehicles; telemetry objects, namely, telemeters; smart connected objects, namely, cameras, thermostats, electrical outlets, smoke detectors, carbon monoxide detectors; connected objects of sub-metering, namely, energy meters, water meters; distributed energy resource management system, namely, power generation and distribution management software; power aggregator and power flexibility software to tailor power consumption to demand and availability; batteries, namely, high voltage batteries, electric storage batteries, car batteries, all-purpose batteries, in Class 9;

Lighting bulbs; electrical control systems for heating and air conditioning systems comprising control panels, load controller, switches, and electrical wire, all sold as a unit; heating radiators; solar collectors for heating; electric fans for household purposes; air conditioners; intelligent water valves for plumbing pipes, namely, water control valves for faucets, in Class 11;

Electrically-powered motor vehicles, in Class 12;

Intelligent water valves for plumbing pipes, namely, water-pipe valves, not of metal or plastic, in Class 19;

Intelligent water valves for plumbing pipes, namely, water-pipe valves of plastic, in Class 20;

Installation of household appliances, including home automation products, smart connected objects and telemetry tools; maintenance of home automation systems, namely, technical maintenance of electronic, computer and telecommunication systems used in buildings and allowing centralized or decentralized control of heating, lighting and air conditioning systems, in Class 37;

Electricity generation; recovery and storage of electrical and thermal energy, namely generation through solar panel, energy storage using battery storage or thermal energy storage, virtual power plant services, demand response services, in Class 40; and

Advisory services in the field of energy saving; consulting services in electrical engineering; building and building infrastructure planning to improve energy efficiency; programming of home automation systems, namely, electronic, computer and telecommunication systems used in buildings and allowing centralized control of heating, lighting and air conditioning systems; maintenance of products and software for home automation systems, namely, technical

maintenance of products and software for electronic, computer and telecommunication systems used in buildings and allowing centralized control of heating, lighting and air conditioning systems, in Class 42.

## **REMARKS**

### **I. IDENTIFICATION OF GOODS AND SERVICES**

The Examining Attorney requested Applicant to amend the identification of goods and services. Accordingly, Applicant has amended the identification of goods and services as indicated herein.

### **II. FOREIGN REGISTRATION BASIS**

The Examining Attorney has requested a copy of the corresponding foreign registration to perfect the Section 44(e) basis. Applicant respectfully submits that the corresponding foreign registration has not yet issued and requests that the application be suspended in the interim.

## **CONCLUSION**

In light of the information set forth above, Applicant respectfully submits that the application is in the condition to be passed to publication and that prosecution of the application be suspended pending the issuance of the foreign registration. In the event the Examining Attorney has any additional questions, the Examining Attorney is requested to contact the undersigned.

Respectfully submitted,

KNOBBE, MARTENS, OLSON & BEAR LLP
