Class 42: Computer software development, namely, development of a software platform used by others to conduct securities offerings and initial coin offerings (ICO); Providing online non-downloadable software for development of a platform used by others to conduct securities offerings and initial coin offerings (ICO); IT consulting services; IT consulting services in the field of ~~cryptography, cryptocurrency~~, cryptosecurities, and digital currency; Technical support services, namely, troubleshooting of computer software problems; technical support services, namely, troubleshooting of software platforms for conducting securities offerings; Research and development of technology in the fields of ~~cryptography, cryptocurrency~~, cryptosecurities and digital assets and ~~digital currency~~

Requirement for Information

Pursuant to the Examiner's request, Applicant submits the following information:

(1) STO is an acronym for the wording Securities Token Offering. Applicant's services are provided in the fields of cryptosecurity and digital assets.

(2) Response to the following questions:

* Does the acronym "STO" stand for "Security Token Offering" and/or "Securities Token Offering"?

Yes, both interchangeably.

* Are "securities tokens" a type of cryptocurrency or cryptosecurity?

Applicant's mark, SECURITIES TOKEN, is used with services relating to cryptosecurities and digital assets, which are representations of shares on the blockchain. That is, rather than having a paper share certificate to represent ownership of shares in a company, the holder has a digital representation of the shares that reside on the blockchain, and applicant's services are provided in connection therewith.

* Are "securities tokens" a type of digital asset or digital currency?

Applicant's mark is used with services relating to cryptosecurities and digital assets, as discussed above.

* Does applicant provide financial consultation or financial information in the field of securities tokens?

No. Applicant has amended the description of services offered under Applicant's mark to clarify.

* Does applicant provide conferences, seminars and classes in the field of securities tokens?

Applicant provides conferences, seminars and classes in the fields of technology and cryptosecurities.

* Does applicant provide computer software in the field of securities tokens?

Applicant provides computer software to conduct securities offerings and initial coin offerings in the fields of cryptosecurity and digital assets.

- * Does applicant develop computer software in the field of securities tokens?
Applicant develops computer software to conduct securities offerings and initial coin offerings in the fields of cryptosecurity and digital assets.
- * Does applicant provide technical support for software in the field of securities tokens?
Applicant provides technical support in the form of troubleshooting of software platforms for conducting securities offerings.
- * Does applicant provide research and development of technology in the field of securities tokens?
Applicant provides research and development of technology in the fields of cryptosecurity and digital assets.

Conclusion

Based upon the foregoing, Applicant submits that it has addressed the issues raised in the Office Action and respectfully requests that the Mark be allowed to proceed to publication. If there are any remaining concerns with respect to this application, please contact the Attorney of Record.
