FLIR Introduces New Dragonfly 7 PRO Fishing Sonar and GPS

FLIR unveiled today at the New York Boat Show the new Raymarine Dragonfly 7 PRO, Raymarine's most feature-rich sonar +GPS combination yet for fresh and coastal saltwater fishing. Offering the same advanced features

display, and higher resolution for photo-like sonar images thanks to the exclusive DownVision™.

Starting at $649.99, Dragonfly 7 PRO surpasses ordinary imaging sonars with deep water performance down to 600 ft. (180m) and high-speed bottom tracking. It also comes equipped with a conventional high-frequency CHIRP sonar channel for targeting fish and bottom tracking down to 900 ft. (277m).

Dragonfly 7 PRO's fast acquisition 10Hz GPS sensor and mapping helps users stay on course, while Raymarine's Wi-Fish™ mobile app lets them stream Compressed High Intensity Radiated Pulse "CHIRP" DownVision directly to their smartphone or tablet. Dragonfly 7 PRO's built-in Wi-Fi also syncs with the Navionics Boating app to allow anglers to use Dragonfly's CHIRP sonar to create their own high-definition bathymetry maps in real time.

For more information of the new Raymarine Dragonfly 7 PRO, please visit www.raymarine.com/dragonfly.

MultiTech Dragonfly™

Embedded Cellular Modem and System-on-Module (SoM) (MTQ Series)

The Dragonfly™ embedded cellular modems and SoMs are fully certified and MNO approved, ready-to-integrate modules that offer developers the functionality of a programmable computing platform with the convenience of an onboard cellular radio all in one compact design. From a software perspective, Dragonfly is compatible with the Arm® Mbed™ programming platform allowing for rapid prototyping, development and deployment. With its integrated Cortex®-M4 processor, developers can host their application and have access to a full suite of interfaces for connecting sensors or other remote assets.

As the first Arm Mbed cellular SoM listed on mbed.org that is industry certified and deployment ready, applications can be written and compiled quickly online using developer friendly libraries, downloaded and hosted within the Dragonfly.

Dragonfly can be used as an embedded cellular SoM providing the maximum in design and application flexibility or it can be used as an embedded cellular modem requiring little or no modification to your existing design.

This powerful suite of hardware and software products greatly reduces your time to market and makes your Internet of Things (IoT) device a reality today.

MultiTech Connection Manager – a software solution designed to greatly simplify and ease the installation, configuration and management of cellular connectivity in MultiTech USB and serial cellular modems that lack intelligence to manage these functions. Learn more here.

Learn more - Next steps for 2G/3G cellular migration

Click here for important information on Verizon LTE Cat 1 devices.

- Developer documentation and support available at www.multitech.net

KEY BENEFITS

- End device certified by leading carriers
- Family of cellular options include 4G-LTE and 3G HSPA+
- Developer friendly to integrate and quickly deploy assets
- Long solution lifecycle reduces redesign time and cost

© Copyright 2019 HP Development Company, L.P. The information contained herein is subject to change without notice. The only warranties for HP products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. HP shall not be liable for technical or editorial errors or omissions contained herein.

USB Type-C™ and USB-C™ are trademarks of USB Implementers Forum.

Intel, the Intel logo, Intel Core, Intel vPro, Core Inside and vPro Inside are trademarks of Intel Corporation or its subsidiaries in the U.S. and/or other countries.

1. Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers and/or software to take full advantage of Windows functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See http://www.windows.com.

2. Sold separately or as an optional feature.

3. Based on compact business convertibles with 8th Gen Intel® Core™ vPro® U series processor, Windows Pro OS, vPro™ and a convertible non-detachable under 59 cubic inches as of August 2019.

4. a. Gigabit-class 4G LTE module is optional and must be configured at the factory. Module designed for up to 1 Gbps download speeds as carriers deploy 5 carrier aggregation and 100Mhz channel bandwidth, requires activation and separately-purchased service contract. Backwards compatible to HSPA 3G technologies. Check with service provider for coverage and availability in your area. Connection, upload, and download speeds will vary due to network, location, environment, network conditions, and other factors. 4G LTE not available on all products, in all regions.
b. Wi-Fi 6 is backwards compatible with prior 802.11 specs. The specifications for Wi-Fi 6 (802.11ax) are draft and are not final. If the final specifications differ from the draft specifications, it may affect the ability of the laptop to communicate with other 802.11ax devices. Only available in countries where 802.11ax is supported.
Wi-Fi® supporting gigabit speeds is achievable with Wi-Fi 6 (802.11ax) when transferring files between two devices connected to the same router. Requires a wireless router, sold separately, that supports 160MHz channels.

5. HP Privacy Camera only available PCs equipped with HD or IR camera and must be installed at the factory.

6. HP Sure View Gen3 integrated privacy screen is an optional feature that must be configured at purchase and is designed to function in landscape orientation.

7. HP Multi Factor Authenticate requires 7th or 8th Generation Intel® Core™ processor, Intel® integrated graphics, and Intel® WLAN. Three authentication factors require an Intel® vPro™ processor.

8. Based on HP's unique and comprehensive security capabilities at no additional cost and HP Manageability Integration Kit's management of every aspect of a PC including hardware, BIOS and software management using Microsoft System Center Configuration Manager among vendors with >1M unit annual sales as of November 2016 on HP Elite PCs with 7th Gen and higher Intel® Core® Processors, Intel® integrated graphics, and Intel® WLAN.

9. HP Sure Sense requires Windows 10. See product specifications for availability.

10. HP Sure Click is available on select HP platforms and supports Microsoft® Internet Explorer, Google Chrome™, and Chromium™. Supported attachments include Microsoft Office (Word, Excel, PowerPoint) and PDF files in read-only mode. Check https://h20195.www2.hp.com/v2/GetDocument.aspx?docname=4AA7-0922ENW for all compatible platforms as they become available.

We use cookies to personalize content and ads, to provide social media features and to analyse our traffic. We also share information about your use of our site with our social media, advertising and analytics partners in accordance with our Privacy Statement. You can manage your preferences in Cookie Settings. By using this website, you agree to the use of cookies.

❯ Cookie Settings

14. HP Manageability Integration Kit can be downloaded from https://www.hp.com/go/clientmanagement

15. Starting weight less than 1kg is only available in certain configurations.

16. Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.

17. Windows Hello requires Windows 10. Internet connection required for online logins and sold separately.

18. Compatible with Windows, MacOS, Linux®, and Android™ devices.

19. Listening to personal stereo equipment at full volume for long periods can damage the user's hearing. To reduce the risk of hearing damage, lower the volume and amount of time listening at full volume.

20. Audio Module sold separately and required for audio

21. 5v@3A from the connected device required for 15W power to the display. Video over USB-C™ requires a device with USB-C™ DisplayPort™ Alt mode or Thunderbolt™.

22. Lock sold separately.

23. 1000 nit display is an optional feature that must be configured at the factory. Touch-enabled display and Sure View privacy panel will lower actual brightness.
