The screenshot shows the USPTO TSDR (Trademark Status & Document Retrieval) interface. At the top, there is a search bar with the URL `tsdr.uspto.gov/#caseNumber=88110674&caseSearchType=US_APPLICATION&c`. The page header includes the USPTO logo and navigation links for Patents, Trademarks, and Learning and Resources. A red box contains important system notices regarding API data and intermittent issues. Below this is a search form where '88110674' has been entered. The search results show 11 documents found, with a table listing document details.

BULK DATA: Since May 7 at 12 a.m., the TSDR Application Programming Interface (API) has not included all information. Images of trademark registration certificates issued since July 2016 and some office actions are absent in the API. Customers who need to retrieve a copy of a registration certificate or an office action should download it directly from the TSDR documents tab.

INTERMITTENT SYSTEM ISSUES: Due to high-volume usage, you may experience intermittent issues on the Trademark Status and Document Retrieval (TSDR) system between 6 – 8 a.m. ET. Refreshing your web browser should resolve the issue. If you still need assistance accessing a document, email teas@uspto.gov and include your serial number, the document you are looking for, and a screenshot of any error messages you have received.
