ABOUT KERSHAW KNIVES

Making Great Knives Since 1974

THERE IS NOTHING LIKE A KERSHAW

From award-winning technologies and advanced materials to the solid sound of the blade lockup, when you're carrying a Kershaw, you know you're carrying the real thing.

The real thing means value and plenty of it. With Kershaw, you get incredible bang for your hard-earned buck. Even our inexpensive models are impressive. In fact, everything about a Kershaw is solid, crafted, reliable. That's why we can back each of our knives for the life of its original owner against any defects in materials and construction with our famous Limited Lifetime Warranty.

And yes, people do own their Kershaw knives for a lifetime. (Although, occasionally, a Kershaw has been known to get accidentally left at a campsite, lost in the garage, or permanently borrowed by a friend.)

The point is, you can always look to Kershaw for everyday carrying knives that can tame any cardboard box and liberate any purchase from its plastic packaging, sporting knives that make hunting, fishing, watersports, and camping even better, work knives that won't let you down, and tactical knives that ensure you're ready for anything.

OUR FOUNDING MISSION

Kershaw was founded in 1974 to design and manufacture tools that knife users would be proud to own, carry, and use. This has meant that every Kershaw knife must be of the highest quality. Whether it's a hardworking pocketknife, a hunting knife, or a special collectors' edition, Kershaw always chooses appropriate, high-quality materials and is dedicated to intensive craftsmanship. Along with extremely tight tolerances and state-of-the-art manufacturing techniques, this ensures that Kershaw knives provide a lifetime of performance.

A COMMITMENT TO INNOVATION

Kershaw pioneered the use of many of the technologies and advanced materials that are today standard in the knife industry. Our SpeedSafe assisted opening knives were first-to-market. We introduced the concept of knives with interchangeable blades in our Blade Traders. Recently, our Composite Blade technology, which combines two steels into one blade, gives knife users the best of both worlds by enabling us to use steel known for edge retention on the edge and steel known for strength on the spine. And we will keep on innovating, bringing new and better technologies and materials to today's knifemaking industry and knife-using public.

A BRAND OF KAI USA LTD.

Kershaw Knives is a brand of Kai USA Ltd, a member of the Kai Group. For over 100 years, Kai has been Japan's premier blade producer. Kai takes an innovative approach to product development based on the close coordination of research and development, production, marketing, and distribution functions. While many of Kershaw's quality products are made in our 55,000 sq. ft. facility in Tualatin, Oregon (just south of Portland), we also draw on Kai's resources to provide the very best for the customer.

If this is your first Kershaw, be prepared. You just may be back for more. If it's not your first Kershaw, welcome back. We've got some cool new blades to show you—along with a wide selection of your favorites. For design, innovation, quality, and genuine pride of ownership, Kershaw is the one.
