Add to Wishlist Install

Unleash your electronic cash

Pay by phone wherever Flexa is accepted

Supports BTC, ETH, LTC, BCH, GUSD, and ZEC

- Bitcoin
- Bitcoin Cash
- Ether
- Litecoin
- Gemini Dollar
- Zcash

POWERED BY flexa

Unleash your electronic cash—instantly—with just one tap and no fees. Powered by Flexa, SPEDN makes it possible to spend Bitcoin and other cryptocurrencies without needing to cash out to US dollars or load a plastic card. Instead, just take your phone or tablet into any store that accepts Flexa, tap the brand where you'd like to spend your cryptocurrency, and scan your unique flexcode for payment.

LOAD
 Tap the coin you want to load into the SPEDN app, and then reveal a unique deposit address in order to easily load the balance of your choice from any other cryptocurrency exchange service.

TAP
 When you're ready to spend, just open SPEDN, tap the name of the Flexa-accepting store where you'd like to use your cryptocurrency, and reveal your flexcode for instant payment at point-of-sale.

PAY
 Finally, have your cashier scan the dynamic flexcode that appears on screen. In seconds, your cryptocurrency balance is converted into dollars, covering all or part of your purchase, and your transaction is complete.

SPEDN currently supports Bitcoin (BTC), Ether (ETH), Litecoin (LTC), Bitcoin Cash (BCH), and the Gemini dollar (GUSD), with many more coins coming soon.

COLLAPSE

WHAT'S NEW
 What's New:
 • We're delivering some major overhauls under the hood in order to make opening the app, choosing wallets, and using flexcodes even faster and more reliable.
