TraknProtect Solutions

WELCOME TO THE FUTURE OF HOTELS

The TraknProtect platform is easy to install and maintain providing a robust platform for employee safety, inventory tracking, room tray tracking and vendor tracking.

OUR TECHNOLOGY

The TraknProtect platform is a network of gateway hubs constantly gathering real-time location data from TraknProtect devices to provide precise accuracy.

Sensors

Safety buttons, inventory, room trays and vendor tracking sensors send data to hubs.

Hubs

The data is received through our hubs and pushed to our software in real time.

Software

Our software computes the data immediately, making it available to our apps.

Desktop & Mobile

TraknProtect apps display real-time data available on mobile, web and desktop!
