 An illustration featuring a laptop with a green WiFi icon on its lid. A white data card is shown in the foreground with the following information:
 

- MetaGeek's New Office** (with a location pin icon)
- Vanessa Gertman** (with a person icon)
- Last visited **Aug 22, 2019** (with a calendar icon)
- 39** Sessions
- 72** Room Scans
- 12** Rooms

MetaGeek Plus includes the ability to take Network Snapshots in inSSIDer or Air Viewer. Snapshots help you see changes in your network and environment over time, so you can spot issues and fix them. With snapshots, answering questions such as **which networks are new? why did WiFi work yesterday and is struggling today? what's changed?** etc. are now much easier than before.
