## Effortless DR—with no Footprint

**Built-in DR**

Leverage a natively integrated cloud disaster recovery service to protect your VMs.

**Instant Onboarding**

Implement DR in minutes simply by selecting a subscription plan—Xi Leap does the rest.

**One-click Testing**

Streamline DR for business continuity of critical workloads with one-click test, failover, and fallback.

Eliminate the traditional complexity and expense of enterprise disaster recovery. Xi Leap makes cloud-based DR simple, fast, and secure.

## Test Your Readiness Anytime

Streamline disaster recovery processes for business continuity of critical workloads. Dynamically spin up testing environments with a single click and confirm the entire recovery process—without impact to your primary environment.

# Xi Leap Makes Your DR Experience Painless

### Manage from Prism

Centralize all data protection operations for your data center and ROBOs from a single pane of glass.

### Keep Data Secure

Fully protect your workloads against attacks and theft with encryption and network isolation.

### Orchestrate Easily

Leverage seamless workflow orchestration and simple-to-create recovery plans for peace of mind.
