## MEDICAL DEFINITIONS FOR ROBOT

# robot

 [ rō'bōt' ]

*n.*

A mechanical device that sometimes resembles a human and is capable of performing a variety of often complex human tasks on command or by being programmed in advance.

A machine or device that operates automatically or by remote control.

A person who works mechanically without original thought, especially one who responds automatically to the commands of others.

# robot noun

Save Word

ro·bot | \ ˈrō-,bät , -bət \

plural **robots**

## Definition of robot

**1** : a machine that resembles a living creature in being capable of moving independently (as by walking or rolling on wheels) and performing complex actions (such as grasping and moving objects)

// When the next space launch heads for Mars, on board will be dozens of tiny mobile *robots* that will fan out across the Martian landscape, exploring every nook and cranny.

— Michael Bowker

*often* : such a machine built to resemble a human being or animal in appearance and behavior

// While science fiction *robots* have been capable of independent thought, emotions, even a little cooking and sewing, scientists are finding that endowing a mechanical being with even the most basic human functions is a monumental challenge.

— Greg Freiherr

// As a sign of the times, paleontologists themselves have taken to ... designing dinosaur *robots* and displays ...

— Malcolm W. Browne

—often used before another noun

// a *robot* dog

// a *robot* servant

— compare [ANDROID](#), [BOT](#) entry 3

**2 a** : a device that automatically performs complicated, often repetitive tasks (as in an industrial assembly line)

// the use of *robots* in car manufacturing

// ... factories run by *robots* producing many replicas of one product.

— Morris Philipson

—often used before another noun

// For fluid applications, especially in the automotive industry, the *robot* arm must have extremely flexible movement.

— Harry H. Poole

**b** : a mechanism guided by automatic controls

// a *robot* airplane
