About ColorFlip™

Click to discover the concept behind METEOR's latest tunable white solution

Traditionally, tunable white solutions show undesirable LED light source from the control board. Our new ColorFlip™ chip has **70%** increased heat dissipation than traditional designs, which allows the flipped LEDs to join together on a compact **1.2-inch** diameter area while delivering up to **10,000lm** efficiency.

Quality Tunable White Light

ColorFlip™ delivers consistency in color temperature and intensity. Smooth, flicker-free light is achieved with proprietary VX Driver.

Efficacy Up to 105 LPW

The ColorFlip™ light engine has the highest light output in the market at up to **10,000** lumen. We use 200W light engine into 100W tuning white fixture for consistent high lumen output.
