FLAME-FOAM®

Solid cartridge CLASS-A Foam Technology used by Fire Fighting Professionals

Now available to Homeowners!

FLAME-FOAM® is an easy-to-use, affordable, SOLID CARTRIDGE Class-A foam system for pre-treatment during the threat of wildfire while performing other hazardous activities such as managing burn piles, mowing or weed trimming. FLAME-FOAM® makes water 5x more effective at extinguishing fires by 'wetting' the water to make it penetrate better, evaporate slower and block the oxygen feeding a fire.

The FLAME-FOAM® applicator is a revolutionary new way for anyone with a garden hose or Fire hose to produce Class-A foamed water suitable for protecting Class-A fuels. Simply place a foam cartridge in the applicator, attach the applicator to a standard garden hose, and your FLAME-FOAM® is ready to operate!

FLAME-FOAM® System Features

- FLAME-FOAM® Inline Mixing Chamber
- Aspirating Foam Nozzle
- GHT or D-Handle Fire Hose Shutoff
- 12" Class-A Solid Foam Cartridges (Up to 1 hour per cartridge)
- Instructional DVD & Manual

Item #	Image	Description	Price
