## The Experts + The Network

We've spanned the world to find the experts who have ***lived it***. They're the ones who deliver the next level learning through the Founders + Leaders platform and they've played big roles in achieving the outcomes at Airbnb, Facebook, Alibaba, and Pinterest, amongst others.

GGV founders also have access to a community of peers both online and offline. They share insights with each other and stay connected through all stages of growth - from product market fit that follows the A to the hiring frenzy that follows the B and all the way through the IPO.

Join us and leverage the leadership platform for the "just-in-time" know-how that's required at the critical junctures that change the game.

“The tactical tools and examples from Management Fundamentals are extremely valuable. I’m looking forward to incorporating them into our performance management process.”

— Jamie Coakley, VP People, Electric
