“LIBIDO VITAMIN.”

New Daily Vitamin and Mineral
Includes Three Libido Botanicals
Backed By Scientific Evidence.

For women, men, couples, people across the gender spectrum and for you.

INTRODUCING THE LIBIDO TRIO:

Boost, Desire and Drive.

If you have better things to do with your time—*like having great sex*—you'll love our simple libido herbs combined with a daily vitamin-mineral complex.

Taking a libido supplement WITHOUT getting the proper micronutrients is like planting seeds in hardscrabble land.

Instead of taking a daily vitamin AND taking libido supplements, now you can take them together in one dose. If you're in a relationship, you can both take them.

Two capsules give you the micronutrients your cells need every day... and we added a "little something more!"

These three botanicals have received human studies confirming their potent effect on libido.

Why Three Different Bottles of Libido Vitamins?

Here's how it works.

Herbal libido supplements achieve and maintain maximum potency when you cycle them.

The Libido Trio comes in a 3, 6 or 12-month supply. Take the first bottle in the first month. The next the second month. The third the final month. Then repeat.

If you're sharing with a partner, order double.

Note: Since **Fenugreek** is purported to make your body fluids taste like maple syrup, you may enjoy starting with Boost.
