In The Box	AI Translator, Charger, User Manual

It is a personal digital assistant because it allows a user to transmit spoken words *wirelessly* to Microsoft Azure Cognitive Services, which enables machine translation and Neural Text-to-Speech capabilities. The translation and voice-text conversions are done remotely on Microsoft’s server engines, and then *wirelessly* transmitted back to the device and emitted via the Cheetah Smart translator. A user to use this device as a personal digital assistant when travelling and be able to communicate in 42 languages.
