Screenshots from Applicant's website:

The screenshot displays a web browser window with the URL 4medica.com/big-data-in-healthcare/. The page features a dark blue header and a main content area with a light gray background. On the left, the heading **4medica Big Data MPI™** is followed by a paragraph: "Unlike conventional MPI engines, the 4medica Big Data MPI™ has superior precision to scale easily with increased loads. State-of-the-art technology generates an immediate ROI by reducing duplication rates from a double-digit to single-digit percentage. Based on the Inverted Index technology pioneered by search engines, real-time continuous tuning and separate algorithms for each data source, we solve healthcare's universal problem of duplicate identities and limited data access. With patient matching as a service, pay for only what you use and ensure the quality of your patient record is as high quality as your organization." Below this text is a dark red button labeled "Request a Demo". To the right is a square image with a dark background, colorful bokeh lights, and a white fingerprint icon. A Windows taskbar is visible at the bottom, showing various application icons and a system tray with the time 9:40 PM and date 6/14/2020. A small tooltip for a PDF file is also present over the taskbar.

4medica Big Data MPI™

Unlike conventional MPI engines, the 4medica Big Data MPI™ has superior precision to scale easily with increased loads. State-of-the-art technology generates an immediate ROI by reducing duplication rates from a double-digit to single-digit percentage. Based on the Inverted Index technology pioneered by search engines, real-time continuous tuning and separate algorithms for each data source, we solve healthcare's universal problem of duplicate identities and limited data access. With patient matching as a service, pay for only what you use and ensure the quality of your patient record is as high quality as your organization.
