

## X-RAY

All x-rays are examined and interpreted by board-certified radiologists. Initial assessments are given to the requesting facility by phone and concluding reports are sent the same day.

## ECHOCARDIOGR AM

Board-certified nursing staff will perform an in-home echocardiogram to report on the patient's blood flow and heart rhythms to help doctors quickly determine if a heart condition is present.

## ULTRASOUND

Ultrasound imaging equipment is set up in-home and examinations are done immediately by a board-certified sonographer. Images and reports are made available electronically shortly thereafter.

## EKG

We provide standard 12 lead electrocardiograms, a tracing will be provided for review by an attending physician who will immediately share the results with the prescribing physician.
