WEG: Our Company

Founded in 1961, WEG is recognized as one of the largest electric machine manufacturers in the world. WEG employs over 30,000 people around the globe and offers a diversified and integrated product line, with sales to more than 135 countries worldwide. Our U.S. operations are growing at an impressive rate and we're looking for talented individuals to help us move forward with this aggressive growth plan.

WEG is committed to building quality products and providing efficient solutions. To achieve this goal, we strive for continuous investment in innovation and team work. Helping people reach their goals by living the values of the company is a passion shared by everyone at WEG.

At WEG, our Values stand as: Human Company, Team Work, Efficiency, Flexibility, Innovation and Leadership.

As a Human Company, we value each individual contribution to our success, and we motivate people by means of integrity, ethics and constant support to

and we motivate people by means of integrity, ethics and constant support to personal development.

WEG, also, supports Green Initiatives such as the implementation of a company-wide recycling program, the use of green chemicals for office cleaning, the elimination of Styrofoam cups, and installation of HVAC economizers on rooftop units and an energy management system to improve overall energy efficiency.

Role: Test Technician--Power Transformers

In this role, see yourself in support of final performance testing for power transformers.

You will perform all electrical tests required by ANSI Standards to establish

you will perform all electrical tests required by ANSI standards to establish pass/fail of transformer:

- Assist with analyzing part failures, identifying root cause and making recommendations;
- Perform all required electrical & thermal testing: applied voltage, induced voltage, load/no-load loss, resistance, and heat-run;
- Support sound testing: energize unit to compare noise levels to standard requirements;
- Operate impulse system: simulate high voltage surge to ensure quality of various components;
- Implement corrective/preventive actions;
- Collect, enter and analyze test data into Test Bay Application, Test program, or Excel spreadsheet;
- Read and interpret information from bill of material packet for information concerning connections, special testing, customer requirements, etc.;
- Move transformers into and out of inspection area;
