CLEAN SWEEP®

Automatic Coil Cleaner

CLEAN SWEEP® AUTOMATIC CONDENSER COIL CLEANER

Clean Sweep® is an electronically controlled brush mechanism that automatically cleans dust and debris from the condenser coil daily. The brush assembly cycles every 24 hours so dust doesn't collect and build-up on the coil fins, which reduces airflow and in turn forces the compressor to work harder to control critical temperatures. Clean Sweep® strengthens refrigeration performance by ensuring proper ventilation through the coil.

Clean Sweep® (Automatic Coil Cleaner) - Structural Concepts

0
ite
ms

consumes more electricity to maintain proper temperature. Clean Sweep easily
pays for itself with the savings from the cost of one or two service calls.
