KleenSweep® Centrifugal Separation System

The centrifugal filtration of the KleenSweep provides continuous removal of fines from cooking oil to improve your product's quality, is simple to operate, and requires minimal floor space.

BACK TO OIL MANAGEMENT

Simplify your operation

Provide dependable, efficient operation with minimal maintenance with our uncomplicated system.

Eliminate the need for messy filter belts, bags, and drawers because KleenSweep filters are self-cleaning. Usable oil is continuously recovered without the use of compression chambers, which can cause fines when re-entering the oil stream.

IDEAL APPLICATIONS:

- Snack foods
- French fries
- Prepared foods
