ARGUMENT(S)	

This responds to the Office Action issued on February 4, 2015, for the Application to register AMAZON REGISTRY SERVICES ("Applicant's Mark") in Classes 35, 42 and 45 ("Application"), by Amazon Registry Services, Inc. ("Applicant").

DISCUSSION

I.   Cited Applications and Registrations - Single Source & Unity of Control

The Examining Attorney refused the Application under Trademark Act Section 2(d), 15 U.S.C. §1052(d), citing the following trademark registrations and applications, all owned or filed by Amazon Technologies, Inc. ("Cited Marks"):

- **AMAZON**, U.S. Reg. No. 3868195
- **AMAZON.COM**, U.S. Reg. No. 4608470
- **AMAZON LOCAL REGISTER**, U.S. App. Ser. No. 86364998
- **AMAZON & Design**, U.S. App. Ser. No. 86364995

A close relationship between associated companies will obviate any likelihood of consumer confusion between the companies' trademarks, as the public will perceive the parties' corresponding goods and services as emanating from a single source. *See In re Wella A.G.*, 787 F.2d 1549, 1552, 229 U.S.P.Q. 274, 276 (Fed. Cir. 1986); *In re Wella A.G.*, 5 U.S.P.Q.2d 1359, 1361 (T.T.A.B. 1987); Trademark Manual of Examining Procedure ("T.M.E.P.") §1201.07.   In addition to this close relationship and the consumer perception that the parties' goods and services emanate from a single source, the parties must also exercise a unity of control over the use of the parties' trademarks. *Wella*, 5 U.S.P.Q.2d at 1361. Closely related sister companies, which share a common parent and operate under identical trademarks, can create the necessary consumer perception of a single source of goods or services and avoid any likelihood of consumer confusion between the companies, their trademarks, and their corresponding goods or services. For example, T.M.E.P.

§1201.7(b)(iii) explains a scenario where both an applicant and a registrant offer related goods or services under the same trademark, are closely related sister companies, and each is owned by a common third-party parent company. This relationship between the companies and the shared use of similar trademarks can create the consumer perception that the parties' goods and services emanate from a single source, rather than individual entities, avoiding likelihood of consumer confusion. *See id*.

Similarly, here, Applicant and Amazon Technologies, Inc. are closely-related sister companies. Both Applicant and Amazon Technologies, Inc. are owned by the same parent, Amazon.com, Inc. and all three companies offer goods or services under the shared AMAZON-formative family of trademarks. When encountering Applicant's Mark and the Cited Marks, consumers will understand that the services offered by both Applicant and by Amazon Technologies, Inc. under their respective AMAZON-formative trademarks emanate from the same source, namely "Amazon", which obviates any likelihood of consumer confusion between Applicant's use of Applicant's Mark and Amazon Technologies, Inc.'s use of the Cited Marks. Therefore, Applicant respectfully requests the Examining Attorney withdraw the Trademark Act Section 2(d), 15 U.S.C. §1052(d) refusal.

II.   Request for Suspension

In the event the Examining Attorney does not withdraw the refusal of the Application under Trademark Act Section 2(d), 15 U.S.C. §1052(d), Application Ser. Nos. 86364998 and 86364995 have not yet matured to registration and Applicant respectfully requests that further action on the Application be suspended, pending final disposition of these cited applications. 37 C.F.R. § 2.83(c); T.M.E.P. § 716.02(c).

III.   Amendments to Identification of Services

Applicant respectfully requests the following amendments to the identification of services:

Class 35: *Domain name directory services* ~~Maintaining a registry of domain names and Internet Protocol ("IP") addresses; commercial information and directory services; providing commercial information and on-line directory information services for locating Internet and other computer network addresses; providing an online directory of domain names and domain name ownership, technical, administrative and billing information; retail services for domain names; providing information concerning listings of domain names for sale by others; conducting auctions of domain names for sale; computerized database management, namely, developing, maintaining and administering computerized databases of top-level domain names~~

Class 42: ~~Domain name registry services; generic top-level domain registry services; domain name registration services;~~ Domain registry operator services; ~~domain name registry services, namely, coordinating the registration of domain names for identification of users and internet protocol addresses on the Internet; providing services to enable persons and entities to reserve and register Internet domain names and addresses and to access, add, modify, or delete information relating to their domain names; conducting computerized searches for domain names; searching and retrieving information, sites, and other resources on domain names available on computer networks for others; accrediting domain name registrars; creating and administrating qualifications for domain name registration service providers; storage of public WHOIS data for domain names; account management services for domain names, namely, locking domain names to prevent unauthorized transfers of domain names to unauthorized parties; computer services, namely, data encryption services for digital communications featuring digital encryption certificates; providing data encryption services in electronic transactions and communications on a global computer network; Domain Name System ("DNS") management and maintenance; domain name registry management and maintenance; Domain Name System ("DNS") infrastructure services; developing and hosting a server on a global computer network for the purpose of resolving domain names to internet protocol addresses; domain name and Domain Name System ("DNS") information propagation, and resolution of Domain Name System ("DNS") requests; providing a web-based system and on-line portal for partners to manage Domain Name System (DNS) data; providing an online computer database in the field of domain name registration information; developing and hosting a server on a global computer network for the purpose of resolving domain names to internet protocol addresses~~

Class 45: *Providing a searchable online database in the field of domain name registration information; providing information in the field of domain name registry operations* ~~Domain name registry services; generic top-level domain registry services; domain name registration services; domain name services, namely, the registration, transfer, and renewal of domain names for others; information services concerning availability and expiration of domain names; providing user authentication services in electronic transactions and communications; consulting services for setting up, management and compliance activities relating to domain name registrars; providing a searchable internet database of domain name registration information~~; authentication, issuance and validation of digital certificates; ~~domain name searching services; information services concerning availability of domain names; information services in the field of identifying domain names for sale and expired domain names~~

The FINAL description of services should read as follows:

Class 35: Domain name directory services

Class 42: Domain registry operator services

Class 45: Providing a searchable online database in the field of domain name registration information; authentication, issuance and validation of digital certificates; providing information in the field of domain name registry operations

Each of the proposed amendments are equivalent to or logically encompassed by items already included in Classes 35, 42 and 45 and

pursuant to T.M.E.P. §1402.06(a), Applicant respectfully requests entry of these amendments.

IV.　　Disclaimer

Applicant respectfully requests to disclaim the wording "REGISTRY SERVICES", specifically:
　　No claim is made to the exclusive right to use "REGISTRY SERVICES" apart from the mark as shown.

CONCLUSION

　　Applicant believes that it has responded to each of the issues raised in the Office Action and respectfully requests the Examining Attorney withdraw the refusal based on the Cited Marks or that further action on the Application be suspended, pending final disposition of the cited applications.

Response to Office Action

To the Commissioner for Trademarks:

Application serial no. **86419254** AMAZON REGISTRY SERVICES(Standard Characters, see http://tmng-al.uspto.gov/resting2/api/img/86419254/large) has been amended as follows:

ARGUMENT(S)
In response to the substantive refusal(s), please note the following:

This responds to the Office Action issued on February 4, 2015, for the Application to register AMAZON REGISTRY SERVICES

("Applicant's Mark") in Classes 35, 42 and 45 ("Application"), by Amazon Registry Services, Inc. ("Applicant").

<u>DISCUSSION</u>

I.   Cited Applications and Registrations - Single Source & Unity of Control

The Examining Attorney refused the Application under Trademark Act Section 2(d), 15 U.S.C. §1052(d), citing the following trademark

registrations and applications, all owned or filed by Amazon Technologies, Inc. ("Cited Marks"):

- **AMAZON**, U.S. Reg. No. 3868195

- **AMAZON.COM**, U.S. Reg. No. 4608470

- **AMAZON LOCAL REGISTER**, U.S. App. Ser. No. 86364998

- **AMAZON & Design**, U.S. App. Ser. No. 86364995

A close relationship between associated companies will obviate any likelihood of consumer confusion between the companies'

trademarks, as the public will perceive the parties' corresponding goods and services as emanating from a single source. *See In re Wella*

A.G., 787 F.2d 1549, 1552, 229 U.S.P.Q. 274, 276 (Fed. Cir. 1986); *In re Wella A.G.*, 5 U.S.P.Q.2d 1359, 1361 (T.T.A.B.

1987); Trademark Manual of Examining Procedure ("T.M.E.P.") §1201.07.   In addition to this close relationship and the consumer

perception that the parties' goods and services emanate from a single source, the parties must also exercise a unity of control over the use of the parties' trademarks. *Wella*, 5 U.S.P.Q.2d at 1361. Closely related sister companies, which share a common parent and operate under identical trademarks, can create the necessary consumer perception of a single source of goods or services and avoid any likelihood of consumer confusion between the companies, their trademarks, and their corresponding goods or services. For example, T.M.E.P. §1201.7(b)(iii) explains a scenario where both an applicant and a registrant offer related goods or services under the same trademark, are closely related sister companies, and each is owned by a common third-party parent company. This relationship between the companies and the shared use of similar trademarks can create the consumer perception that the parties' goods and services emanate from a single source, rather than individual entities, avoiding likelihood of consumer confusion. *See id*.

Similarly, here, Applicant and Amazon Technologies, Inc. are closely-related sister companies. Both Applicant and Amazon Technologies, Inc. are owned by the same parent, Amazon.com, Inc. and all three companies offer goods or services under the shared AMAZON-formative family of trademarks. When encountering Applicant's Mark and the Cited Marks, consumers will understand that the services offered by both Applicant and by Amazon Technologies, Inc. under their respective AMAZON-formative trademarks emanate from the same source, namely "Amazon", which obviates any likelihood of consumer confusion between Applicant's use of Applicant's Mark and Amazon Technologies, Inc.'s use of the Cited Marks. Therefore, Applicant respectfully requests the Examining Attorney withdraw the Trademark Act Section 2(d), 15 U.S.C. §1052(d) refusal.

II.   Request for Suspension

In the event the Examining Attorney does not withdraw the refusal of the Application under Trademark Act Section 2(d), 15 U.S.C. §1052(d), Application Ser. Nos. 86364998 and 86364995 have not yet matured to registration and Applicant respectfully requests that further action on the Application be suspended, pending final disposition of these cited applications. 37 C.F.R. § 2.83(c); T.M.E.P. § 716.02(c).

III.   Amendments to Identification of Services

Applicant respectfully requests the following amendments to the identification of services:

Class 35: *Domain name directory services* ~~Maintaining a registry of domain names and Internet Protocol ("IP") addresses; commercial information and directory services; providing commercial information and on-line directory information services for locating Internet and other computer network addresses; providing an online directory of domain names and domain name ownership, technical, administrative and billing information; retail services for domain names; providing information concerning listings of domain names for sale by others; conducting auctions of domain names for sale; computerized database management, namely, developing, maintaining and administering computerized databases of top-level domain names~~

Class 42: ~~Domain name registry services; generic top-level domain registry services; domain name registration services;~~ Domain registry operator services; ~~domain name registry services, namely, coordinating the registration of domain names for identification of users and internet protocol addresses on the Internet; providing services to enable persons and entities to reserve and register Internet domain names and addresses and to access, add, modify, or delete information relating to their domain names; conducting computerized searches for domain names; searching and retrieving information, sites, and other resources on domain names available on computer networks for others; accrediting domain name registrars; creating and administrating qualifications for domain name registration service providers; storage of public WHOIS data for domain names; account management services for domain names, namely, locking domain names to prevent unauthorized transfers of domain names to unauthorized parties; computer services, namely, data encryption services for digital communications featuring digital encryption certificates; providing data encryption services in electronic transactions and communications on a global computer network; Domain Name System ("DNS") management and maintenance; domain name registry management and~~

maintenance; ~~Domain Name System ("DNS") infrastructure services; developing and hosting a server on a global computer network for the purpose of resolving domain names to internet protocol addresses; domain name and Domain Name System ("DNS") information propagation, and resolution of Domain Name System ("DNS") requests; providing a web-based system and on-line portal for partners to manage Domain Name System (DNS) data; providing an online computer database in the field of domain name registration information; developing and hosting a server on a global computer network for the purpose of resolving domain names to internet protocol addresses~~

Class 45: *Providing a searchable online database in the field of domain name registration information; providing information in the field of domain name registry operations* ~~Domain name registry services; generic top-level domain registry services; domain name registration services; domain name services, namely, the registration, transfer, and renewal of domain names for others; information services concerning availability and expiration of domain names; providing user authentication services in electronic transactions and communications; consulting services for setting up, management and compliance activities relating to domain name registrars; providing a searchable internet database of domain name registration information~~; authentication, issuance and validation of digital certificates; ~~domain name searching services; information services concerning availability of domain names; information services in the field of identifying domain names for sale and expired domain names~~

The FINAL description of services should read as follows:

Class 35: Domain name directory services

Class 42: Domain registry operator services

Class 45: Providing a searchable online database in the field of domain name registration information; authentication, issuance and validation of digital certificates; providing information in the field of domain name registry operations

Each of the proposed amendments are equivalent to or logically encompassed by items already included in Classes 35, 42 and 45 and

pursuant to T.M.E.P. §1402.06(a), Applicant respectfully requests entry of these amendments.

IV.   Disclaimer

Applicant respectfully requests to disclaim the wording "REGISTRY SERVICES", specifically:
No claim is made to the exclusive right to use "REGISTRY SERVICES" apart from the mark as shown.

CONCLUSION

Applicant believes that it has responded to each of the issues raised in the Office Action and respectfully requests the Examining Attorney withdraw the refusal based on the Cited Marks or that further action on the Application be suspended, pending final disposition of the cited applications.

CLASSIFICATION AND LISTING OF GOODS/SERVICES
Applicant proposes to amend the following class of goods/services in the application:
Current: Class 035 for Maintaining a registry of domain names and Internet Protocol ("IP") addresses; commercial information and directory services; providing commercial information and on-line directory information services for locating Internet and other computer network addresses; providing an online directory of domain names and domain name ownership, technical, administrative and billing information; retail services for domain names; providing information concerning listings of domain names for sale by others; conducting auctions of domain names for sale; computerized database management, namely, developing, maintaining and administering computerized databases of top-level domain names
Original Filing Basis:
Filing Basis: Section 1(b), Intent to Use: *For a trademark or service mark application:* As of the application filing date, the applicant had a bona fide intention, and was entitled, to use the mark in commerce on or in connection with the identified goods/services in the application. *For a collective trademark, collective service mark, or collective membership mark application:* As of the application filing date, the applicant had a bona fide intention, and was entitled, to exercise legitimate control over the use of the mark in commerce by members on or in connection with the identified goods/services/collective membership organization. *For a certification mark application:* As of the application filing date, the

applicant had a bona fide intention, and was entitled, to exercise legitimate control over the use of the mark in commerce by authorized users in connection with the identified goods/services, and the applicant will not engage in the production or marketing of the goods/services to which the mark is applied, except to advertise or promote recognition of the certification program or of the goods/services that meet the certification standards of the applicant.

Proposed:
Tracked Text Description: ~~Maintaining a registry of domain names and Internet Protocol ("IP") addresses~~; <u>Domain name directory services</u>; ~~commercial information and directory services~~; ~~providing commercial information and on-line directory information services for locating Internet and other computer network addresses~~; ~~providing an online directory of domain names and domain name ownership, technical, administrative and billing information~~; ~~retail services for domain names~~; ~~providing information concerning listings of domain names for sale by others~~; ~~conducting auctions of domain names for sale~~; ~~computerized database management, namely, developing, maintaining and administering computerized databases of top-level domain names~~

Class 035 for Domain name directory services
Filing Basis: Section 1(b), Intent to Use: *For a trademark or service mark application:* As of the application filing date, the applicant had a bona fide intention, and was entitled, to use the mark in commerce on or in connection with the identified goods/services in the application. *For a collective trademark, collective service mark, or collective membership mark application:* As of the application filing date, the applicant had a bona fide intention, and was entitled, to exercise legitimate control over the use of the mark in commerce by members on or in connection with the identified goods/services/collective membership organization. *For a certification mark application:* As of the application filing date, the applicant had a bona fide intention, and was entitled, to exercise legitimate control over the use of the mark in commerce by authorized users in connection with the identified goods/services, and the applicant will not engage in the production or marketing of the goods/services to which the mark is applied, except to advertise or promote recognition of the certification program or of the goods/services that meet the certification standards of the applicant.

Applicant proposes to amend the following class of goods/services in the application:
Current: Class 042 for Domain name registry services; generic top-level domain registry services; domain name registration services; domain registry operator services; domain name registry services, namely, coordinating the registration of domain names for identification of users and internet protocol addresses on the Internet; providing services to enable persons and entities to reserve and register Internet domain names and addresses and to access, add, modify, or delete information relating to their domain names; conducting computerized searches for domain names; searching and retrieving information, sites, and other resources on domain names available on computer networks for others; accrediting domain name registrars; creating and administrating qualifications for domain name registration service providers; storage of public WHOIS data for domain names; account management services for domain names, namely, locking domain names to prevent unauthorized transfers of domain names to unauthorized parties; computer services, namely, data encryption services for digital communications featuring digital encryption certificates; providing data encryption services in electronic transactions and communications on a global computer network; Domain Name System ("DNS") management and maintenance; domain name registry management and maintenance; Domain Name System ("DNS") infrastructure services; developing and hosting a server on a global computer network for the purpose of resolving domain names to internet protocol addresses; domain name and Domain Name System ("DNS") information propagation, and resolution of Domain Name System ("DNS") requests; providing a web-based system and on-line portal for partners to manage Domain Name System (DNS) data; providing an online computer database in the field of domain name registration information; developing and hosting a server on a global computer network for the purpose of resolving domain names to internet protocol addresses
