WELCOME TO AGILE CONSTRUCTION.

Grit combines the people-centric principles of Lean & Agile, the visualization ease of Building Information Modeling, and the computational power of advanced Artificial Intelligence. The result? Grit is something entirely new, providing the most detailed and responsive construction schedules ever.

Alright, enough with the buzzwords. Grit simply takes some of the best tools available and targets one ambition: To shorten overall construction timelines and to do it without the hundreds of duplicative forms, softwares, meetings and processes.

In other words:

CUT WASTE FROM YOUR SCHEDULE WHILE CUTTING WASTE FROM YOUR SCHEDULING.

ALRIGHT, WHY SHOULD YOU CARE?

WE'VE BEEN WHERE YOU ARE: TRYING TO CUT THROUGH THE MARKETING FLUFF AND FIND REAL SOLUTIONS. GRIT IS SOMETHING COMPLETELY NEW BUILT UPON THE PRINCIPLES OF CONSTRUCTION. WE TARGETED EACH STAKEHOLDER'S PRIORITIES, WHILE ELIMINATING THE WASTE.

OWNERS & ARCHITECTS

Grit informs owners of how each day's activities affect a project's occupancy date, updated in real time.

GENERAL CONTRACTORS

Grit acts as a digital liaison between all parties on a jobsite, capturing and demystifying the production data that makes or breaks projects.

SUBCONTRACTORS

Subcontractors have the most advanced knowledge for their scope of work, so make sure that knowledge is utilized in the schedule.

LAST PLANNER INPUT

By embracing the team, the Last Planner System has been proven to build more reliable schedules.

GENERATIVE SCHEDULING

Utilize the power of Artificial Intelligence to simulate, prioritize and sequence workflows on your project.

REAL-TIME UPDATES

No, we don't mean alerts. No, we don't mean notifications. A true "Living Schedule".

VDC FOR FOREMEN

With a 60 second learning-curve, everyone has access allowing true collaboration.

HISTORICAL 4D & 4CAST

Visualize historical activity as it happened, or jump forward to prepare for the future.

WEEKLY SPRINT PLANNING

Weekly coordination meetings as they should be. Collaborative, Targeted, and of course, Model-Driven.

Grit is doing a better job at integrating the field and office than other softwares. The field has a spot to rep
They have a brain dump in their pocket.
