

About Us

KAP Medical

... Designer & Manufacturer of
State of the Art Therapeutic Immersion Systems
and other Medical Electronic Products

... Technology-driven with a strong belief in
superior quality, teamwork, and innovation

Established in 2000, KAP Medical team of experts count with a vast experience in Research & Development, Engineering, RA/QA, and Manufacturing which can address all your Engineering and Manufacturing Challenges. KAP MEDICAL has not only brought the most innovative and reliable products to the market, but we have done it with high quality and made them affordable. We Design, Manufacture, and Assemble all of our products with pride in Corona, California, USA.

Over the past fifteen years, the members of KAP Medical have developed, designed and manufactured air immersion systems (support surfaces) for the prevention of decubitus ulcers, pulmonary therapy, compression therapy, and other medical electronic products. The team have earned a well-deserved high reputation in the medical industry as developers, designers and manufacturers of high quality state of the art and affordable products available to medical caregivers in home care, acute care, and long term care environments.

In January of 2000 KAP Medical entered the medical electronics market, especially the support surface therapy market as a research and development, designer and contract manufacturer of OEM products. In October 2000 KAP Medical introduced its own line of microcomputer controlled state-of-the-art, and cost-effective new generation portable support surface systems. KAP Medical offers affordable high technology decubitus ulcer management (pressure related wounds or bed sores) products and other medical electronics products for the domestic and international markets.

Who We Are

KAP MEDICAL was founded by: Raj K. Gowda, Dan F. Rosenmayer, and Dave D. Lewis. The above members have over 50 years of cumulative experience in Medical (Sunrise Medical, Plexus Medical, & KAP MEDICAL), Aerospace (Hughes Aircraft), and Industrial Electronics (3M, Xerox, 3D Systems, and Lucus Duralith) products design, manufacturing, and RAQA. Numerous patents have been issued on products designed by the team.

Meet The Founders

- Raj K. Gowda
 - MS Systems Engineering, BS Mechanical Engineering, & BS (Physics, Chemistry, Mathematics)

KAP Medical consistently trains associates on quality policies and maintains an individual responsibility for the implementation and maintenance of the Quality System to meet the requirements of FDA 21 CFR, PART 820-Good Manufacturing practices for medical devices and ISO 13485. KAP Medical provides the necessary resources and associates and thus insures quality objectives are effectively achieved.

Our Quality Policy

KAP Medical will satisfy customer expectations by driving innovation, safety, quality, and service through the implementation of effective, efficient and compliant quality processes, and compliance with applicable regulatory and statutory requirements. All KAP Medical associates are accountable for superior product quality, meeting established objectives, and providing exceptional customer service to internal and external customers.
