## VC3 Solutions

Our company's professionals implement IT projects and services to provide above average returns on investment, significantly enhance productivity, and lower technology ownership costs.

## How can VC3 help you?

VC3 is a dynamic IT services organization that has spent the last decade delivering customer-oriented solutions to both the commercial and public sectors. Our IT projects and services can provide above average returns on investment, significantly enhance productivity and/or lower technology ownership costs.

### Technology Assessments

- ▼ VC3 will document your current systems, compare them against best practices, and then recommend a path to achieve your goals.

### Managed Support Services

- ▼ With VC3's Managed Support Services, we are here to support your world, by providing 7 x 24 maintenance and reactive support to your IT infrastructure anywhere and anytime you need it.

### Unified Communications

- ▼ Connects technologies such as email, instant messaging, and calendaring with various communication devices such as phones, voicemail and video to improve employee efficiency, and business agility as well as profitability.

### Website Design and Hosting

- ▼ Our designers use industry best practices around your website's content to communicate your message successfully.

### Disaster Recovery

- ▼ We have developed a disaster recovery solution that ensures the systems critical to your daily operations are accessible so that you can continue to provide your services when disaster strikes.

### Wireless Networks

- ▼ VC3 has the experience to help you plan and execute a wireless initiative for your business or municipality.

### Video Surveillance

- ▼ VC3's video surveillance solution can help you protect the people and property in your care.

### E-Government
