**George Porter, Jr** (The Meters)

"I found on fly dates that the Ampeg SVT line works anywhere in the world I am. I have seen my guitar player go though hell every night with his amp, but the Ampeg SVT always works."

**PN-210HLF**
**THE IDEAL BASS MONITOR**

Ampeg's PN-210HLF is a modern, lightweight bass enclosure built to handle the power of high-output Ampeg bass heads. Designed and assembled in the U.S.A. out of the highest quality components, including two custom-designed 10-inch neodymium Eminence® woofers, the PN-210HLF delivers high-quality, high-output bass in a modern design that looks mean and plays meaner.

- 550 watts power handling
- 2 x 10" custom U.S. made Eminence neodymium LF drivers
- 1" Eminence APT:50 HF driver with level control
- Extremely rugged and durable enclosure
