Services for Data Management

Data is the lifeblood of the financial services industry. From research and portfolio management to settlement and accounting, each stage of the investment process relies on accurate, timely data. Increased market scrutiny and new regulatory requirements underscore data as a critical business asset.

As data grows in volume and importance, firms are working hard to improve the accessibility, usability and accuracy of their data—and to manage it in a more efficient, cost-effective way.

How Sapient Can Help

Sapient Global Markets offers a complete solution for addressing the operational, audit, regulatory and architectural challenges associated with data management. Combining in-depth industry knowledge with expertise in reference, market and counterparty data—as well as supporting processes and IT systems—our team helps firms more effectively acquire, integrate, cleanse, enrich and transfer information.

Sapient's unique end-to-end approach helps bridge the gap between high-level strategy and data governance to the actual construction and implementation of data management systems. Service areas include:

- ▶ Data Strategy and Transformation
- ▶ Data Governance and Quality
- ▶ Business Intelligence and Analytics
- ▶ Master and Reference Data Management
