WARNING

"Insider risk is still the single highest potential loss that a company has"

KEYGHOST SX®

SECURITY BEGINS FROM WITHIN

POWERFUL INTERNAL SECURITY AND AUDIT TOOL

- Discreetly record and retrieve everything typed, including emails, chatroom activity, instant messages, website addresses, internet searches and more...
- Monitor your sensitive PCs and data entry terminals for backup and detect unauthorised activity
- Pinpoint computer misuse and fraud
- Cannot be detected or disabled with software scanners
- Can be unplugged and information retrieved on another PC

INSTALLS IN UNDER 5 SECONDS!

NO SOFTWARE INSTALLATION IS NECESSARY TO RECORD OR RETRIEVE KEYSTROKES Patents Pending

KEYGHOST SX®

KEYGHOST SX

SECURITY BEGINS FROM WITHIN

"Analyst firms suggest that as many as 70% to 90% of security breaches come from the inside"

PROTECT YOUR SENSITIVE PCs

KeyGhost allows you to monitor anyone's computer activities.

Once installed, KeyGhost discreetly captures and records all keystrokes typed, including chat conversations, email, word processor, or even activity within an accounting or specialist system.

KeyGhost is completely undetectable by software scanners and provides you with one of the most powerful stealth surveillance applications offered anywhere.

Unlike software keyloggers that can be switched off or have their stored keystroke data modified, stolen or erased, KeyGhost is an unobtrusive hardware device and only you can read the data inside.

Because KeyGhost uses STRONG 128-Bit encryption to store the recorded data in it's own internal memory (not on the hard drive), it is impossible for a network intruder to gain access to any sensitive data stored within the device.

KEY BENEFITS

- Easy to install in a few seconds! Simply plug it in and record everything that is typed on the PC.
- No new software to install or learn.
- Keystrokes can be retrieved on the spot – or unit can be unplugged for retrieval on another computer.
- Impossible to detect or disable using software scanners (SpyCop, Who's Watching Me...etc).
- Stores many months worth of keystrokes in non-volatile flash memory (same as in smart cards) that doesn't need power or batteries to retain storage.
- Works on all desktop PCs & all PC-compatible operating systems (Windows, Linux, Dos...etc).

Fact: Software computer monitoring products are extremely difficult to use. KeyGhost provides very easy installation and operation.

KeyGhost Ltd's market-leading keystroke monitoring security solutions are in place at more than 100 Fortune 1000 companies and government entities worldwide.

WHY?

Productivity, Resource Conservation, Security, Liability, Intellectual Property Incidents.

READ WHAT THE TECHNOLOGY PRESS IS SAYING ABOUT KEYGHOST

"I was surprised how easy KeyGhost was to install. The very epitome of plug and play."
ComputerActive

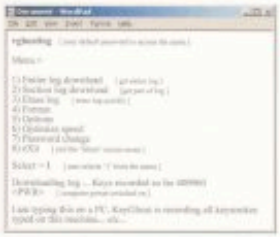
"KeyGhost excels in every department."
Acid Hardware

"We were unable to defeat the KeyGhost...we tried everything...KeyGhost amazed us."
MostlyCreativeWorkshop

USER COMMENTS

"KeyGhost just reduced my stress almost 100%!"
Baron R. K. Von Wolfsheild

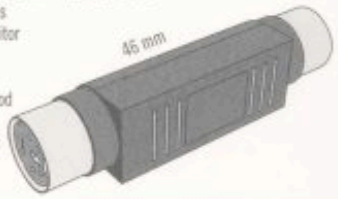
(Appeared in Time magazine, 15 years experience in games design, responsible for such classic games as Galactic Invasion and Firepower)



KeyGhost's built-in 'Ghost menu' system allows you to retrieve and privately view what has been recorded using any standard text editor (e.g NotePad, WordPad...etc).

KeyGhost SX uses a Patent Pending method to enable the highest speed transfer currently achievable - over 450 characters per second - without the need for special adapters, or even to unplug the device.

ACTUAL SIZE



Quick fitting instructions:

KeyGhost plugs in between your keyboard and Desktop PC.
Tamper evident seals (included) help detect unauthorised removal of KeyGhost.

Kit includes: KeyGhost SX. Instruction sheet. Warranty card. Tamper evident seal. Example notification banner as recommended by U.S. Department of Justice.

System Requirements: Desktop IBM PC compatible. PS/2 (small round plug) keyboard.* Works on ALL PC operating systems (Windows 95,98,ME,NT,XP,2000 Linux, Beos, OS/2, Dos, Sun Solaris)
