

Starting Express Score

If you have just installed update 3.1.0:

You must encrypt your Express Score database. To do so, follow the instructions in the ReadMe file located on the Express Score support website. When you have finished the encryption process, you can launch Express Score as explained in the steps below.

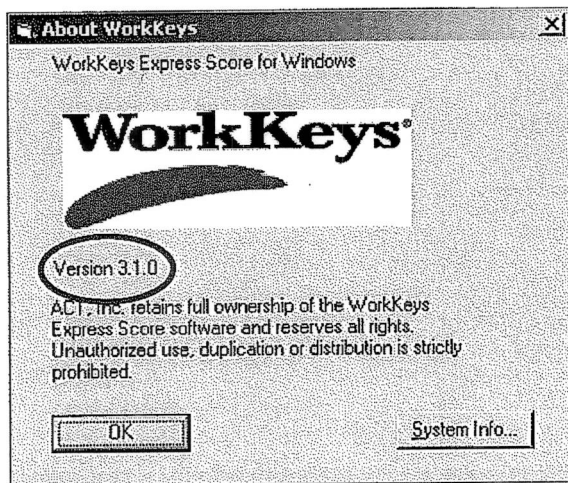

You only need to complete the encryption process once.

Windows 7 Users:

Once you have encrypted your Express Score database (see note above), you must log in to Windows 7 as a user assigned to the Administrators group. A message similar to the following may display: *unwise.exe is an unknown publisher. Do you want to continue?*

Click **Yes** to start using Express Score.

1. Click the Windows **Start** button.
2. Click **Programs**.
3. Locate the **Express Score for Windows 3.0.0** program group.
4. Click **Express Score for Windows**.
5. The About WorkKeys screen will display, as shown below. Note the version change.

6. Click **OK**.
