## Edison Mission Group

**Edison Mission Group** is a holding company which acts through numerous subsidiaries to manage the competitive power generation business and other unregulated subsidiaries of Edison International.

Headquartered in Santa Ana, California, EMG subsidiary **Edison Mission Energy (EME)** is an independent power producer engaged in the business of owning, leasing, operating and selling energy and capacity from electric power generation facilities. EME conducts price risk management and energy trading activities through **Edison Mission Marketing and Trading (EMMT)**, which is based in Boston. EMMT also manages retail electric power and energy sales made by **Edison Mission Solutions, LLC**

EME's continuing operations consist of owned or leased interests in 45 power generation facilities, with an aggregate capacity of 11,274 megawatts (MW), of which EME's ownership share is 10,174 MW.

EME's power generation assets include fossil-fuel power plants in California, Illinois, Pennsylvania, West Virginia and Doga, Turkey; a biomass facility in New York; and one of the largest portfolios of wind energy projects in the U.S. As of November 2010, the wind portfolio comprised 29 projects currently in operation or under construction in Illinois, Iowa, Minnesota, Nebraska, New Mexico, Oklahoma, Pennsylvania, Texas, Utah and Wyoming. EME has a development pipeline of potential wind projects with projected installed capacity of approximately 3,700 MW.

EME subsidiary **Midwest Generation (MWG)** operates six electric power generating plants in Illinois and supervises operation of the EME Homer City Generation plant in Homer City, Pennsylvania. The MWG and Homer City plants are coal-fired merchant plants, producing power that is not committed to be sold under long-term contracts. Most of these plants' output is sold into the PJM Interconnection, LLC, commonly referred to as the PJM marketplace (Pennsylvania-Jersey-Maryland), a 13-state region which extends from the Atlantic coast westward to Illinois.

EME subsidiary **Edison Mission Operations & Maintenance, Inc. (EMOMI)**, operates nine natural gas plants in partnership with other companies in California and a waste coal plant in West Virginia. EMOMI also operates EMG's wind farms. Power from most of these facilities is sold under contracts to various utilities.

The capital and financial services business of EMG is managed by **Edison Capital**, which has investments worldwide in energy and infrastructure projects, including power generation, electric transmission and distribution, transportation and telecommunications. Edison Capital also has investments in affordable housing projects located throughout the United States. Edison Capital subsidiary, Edison Funding Company, provides financial services in support of Edison Capital's investments through third party investors under the **Edison Funding Company®** name.
