Prototype Optics In 1 Week!

- ▶ Aspheres
- ▶ Cylinders
- ▶ Prisms
- ▶ Spheres

Welcome to OPTIMAX

With more than 100 opticians, Optimax is America's largest prototype optics manufacturer. Optimax leverages its optics manufacturing technology for programs that benefit mankind. We have created innovative manufacturing methods and corporate culture that enable faster production of precision optics. Even with many years of experience providing production optics, Optimax remains dedicated to:

- Small Volume
- High Quality
- Quick Delivery

Optimax manufactures prototype optical components for a wide variety of applications and has the capacity to support production requirements. Our strongest market segments for prototype optics are aerospace, display technologies and solar applications. Our strongest markets for OEM production optics are semiconductor, military and medical instruments. Please consider Optimax for your next project.
