

[ABOUT US](#)

BILLIONS OF PIECES CAST

Print 

Dynacast International is a global manufacturer of small, engineered die cast components for thousands of companies in industries such as automotive, consumer electronics, healthcare, hardware, computers and peripherals and many others..

We engineer precision components by combining extensive engineering knowledge with our specialized manufacturing technologies. We help companies around the world save money by identifying components and assemblies in their products that can be redesigned or consolidated through die casting. We have a history of delivering value to our customers through our engineering expertise, efficient operations and Advanced Quality Planning systems.

With Global Headquarters in Charlotte, NC, Dynacast operates 20 manufacturing facilities in 16 countries around the world.
