### Core Competencies Production Phases

Please Click On Any Phase Below For More On How We Can Serve You

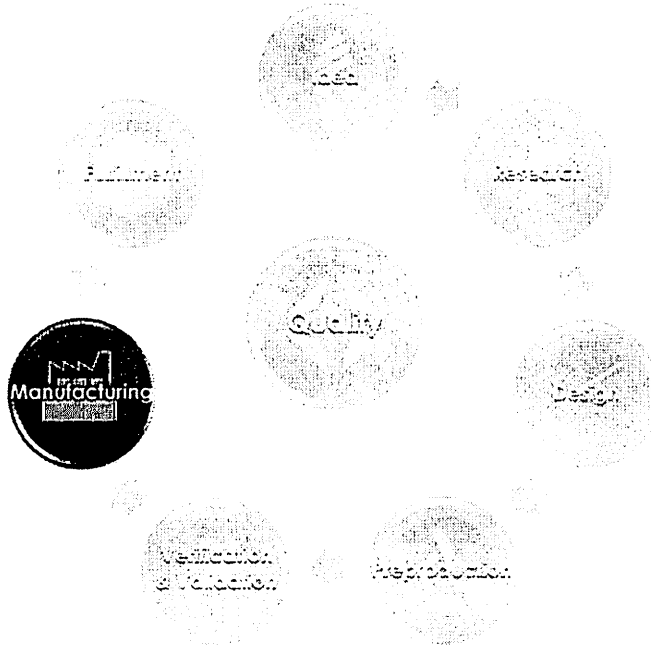

Facet's flexible **MANUFACTURING** systems offer versatility to accommodate a wide spectrum of production requirements from manual assembly to automated high-speed production.

Our manufacturing facilities are:

- QSR/cGMP Compliant
- ISO 13485:2003 Certified
- FDA Registered

Our customized production processes are designed to ensure that your device volume, quality, and cost targets are achieved.

- All equipment is built and maintained to the highest cGMP Standards
- Facet employs a highly trained, qualified and experienced workforce to ensure fulfillment of all requirements while operating in an FDA environment
- Facet utilizes efficient manufacturing processes to minimize waste while maximizing product flow and provide consistent quality throughout the production process
- Facet offers 30 years of experience working with offshore production facilities

*Next we are ready to **FULFILL** your orders for the new product >>*

Facet's R&D team will take your concept, paired with research results, and bring it to life through **DESIGN**.

Facet offers expertise in:

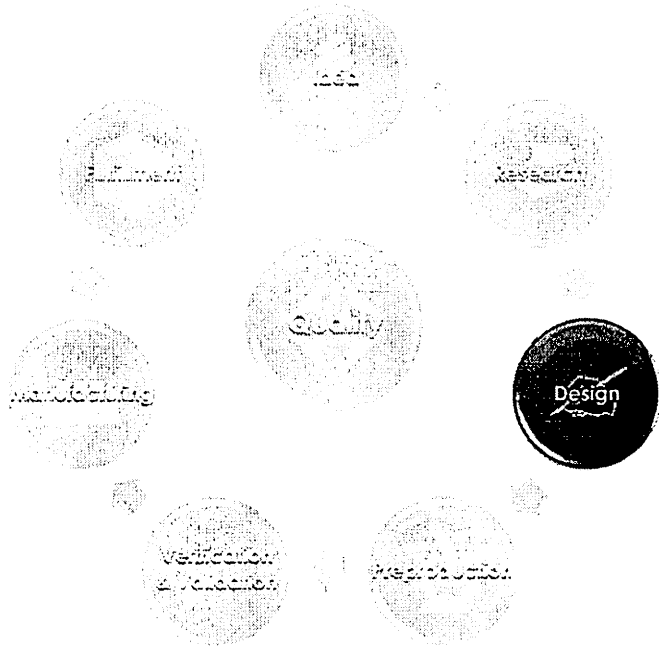

- Product Styling
- Ergonomic Analysis & Design
- Mechanical Design
- Intellectual Property
- Reliability Testing

Facet's design studios offer state of the art technology, including:

- 3-D Solid Modeling (ProEngineer and SolidWorks)
- Rapid Prototyping (3D Printing)
- Allows Facet to quickly provide functional product models for trade shows and demos

Facet's Design team consists of:

- Accomplished Project Managers
- Industrial Designers
- Mechanical Engineers
- Regulatory & Quality Professionals

*Now we will review **PREPRODUCTION** of the selected design concept >>*

**Developed Products - Sureseal™ Pressure Bandages**

SureSeal™ pressure bandages' expanding cellulose sponge, along with secure 4 sided seal, allows the bandage by design to apply pressure directly to the wound.

**Effective for blood collection**

- Self-expands to apply pressure to the wound
- Design helps prevent bleed-through

**Sterile**

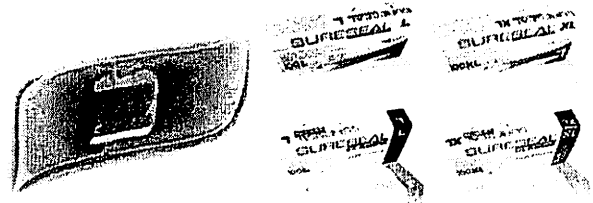

- 4-sided design seals & isolates the wound from elements
- When used as instructed, creates a sterile barrier around the fistula or venous site

**Discrete**

- Clean and comfortable for the patient
- Often less messy solution than gauze and tape
- Allows patients to leave clinic with confidence

**Simple and Easy to Use**

**Sleek and modern solution**

### Developed Products - Carelet<sup>®</sup> Safety Lancets

High quality, single-use lancets offer the form, fit and function you've come to rely on:

#### Trusted Design

- Ergonomically shaped for comfortable use

#### More Accurate Sampling

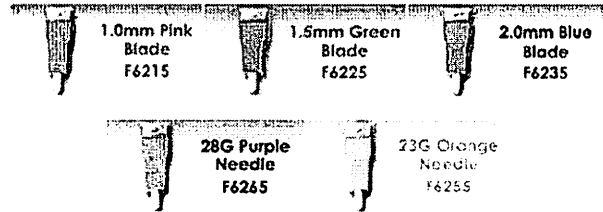

- Distinct color codes promote correct product selection
- Top mounted activation button maximizes visibility for precise placement

#### Simple and Easy to Use

- Single-hand, one-step operation saves valuable time
- Minimized steps reduces training time

#### Promotes Safety

- Engineered for single use only (prevents product reuse)
- Automatic retraction of lancet after activation minimizes exposure of sharp

### Developed Products - Impulse Lancing Device

#### Introducing the Impulse Lancing Device

The new Impulse is an ergonomically designed Lancing Device that allows patients to obtain blood samples with minimal effort.

#### Designed for Ease of Use

- Compatible with most blood glucose meters
- Multiple depth options for patient comfort
- Includes cap for Alternate Site Testing option

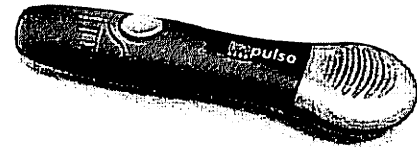

#### Ergonomic Design

- Device fits discreetly in the patient's hand
- Small size allows device to easily fit most meter cases
- Smooth shape is comfortable to hold and use

#### New and Unique Lancet Guidance Technology

- Designed for pain free sampling
- Device is compatible with most standard lancets

Pad printing of device available for private label options
