Offsite Data Storage and Beyond

Recall's offsite storage services provide indexing and records archiving in state-of-the-art facilities that meet strict measures of security, fire prevention and surveillance. Some of the items we can pick up, store, retrieve and deliver for you include:

- Single-page documents in highly active files (e.g., customer contracts or medical files)
- Internal records (e.g., personnel information)
- Regulated files (e.g., legal documentation)
- Archived files and/or cartons
- Proprietary assets such as patented materials
- Digital records (most media types/formats)
- Film and Sound materials
- Architectural drawings and blueprints
- Product samples and/or prototypes
- Historical artifacts

Recall also has a fleet of professional couriers and custom-equipped vehicles to retrieve, deliver and exchange your important documents and records securely, according to stringent operating procedures.

With Recall, you can choose from the following document management solutions:

- **Long-Term Storage:**
For customers seeking compliance and space-saving solutions, Recall offers full-service offsite data storage at over 300 securely monitored, fire-protected facilities around the globe. These services include OnCall® and Legacy™ storage as well as inventory management solutions via ReQuest® Web - Recall's secure tracking, reporting and self-service online system.
- **Rapid Retrieval:**
For the information you need to access - be it specific documents, files or cartons - Recall offers a range of services to ensure your information is well-protected yet securely available when you need it, where you need it and in a format in which you can use it. These services include Pronto™, Image on ReQuest® and ReFiles™ with Routine, Urgent and Priority retrieval options for both physical and digital delivery.

Case Study

Recall provides full-service document storage solution with several retrieval options to global technology company operating in Europe, the U.S. and Asia-Pacific.
