

# Native Technology

## 01 / N3™ Polarized Lenses

The most innovative and advanced polarized lens on the market. N3™ lenses block up to 4X more infrared light than regular polarized lenses, pass Z87.1 testing, provide UV protection up to 400nm, and by significantly reducing blue light and selectively filtering UV, they deliver high contrast, crisp definition, and peak visual acuity.

## 02 / Co-Injected Molding

Native frames now seamlessly incorporate our grippy, comfortable molding right into the plastic.

## 03 / Polarized Crystal Carbonate® [P.C.C.®] Lenses

Optical-quality, impact-resistant lenses block 100% of the harmful UV light and eliminate glare for sharp, clear vision with increased contrast and depth perception. P.C.C. lenses provide outstanding vision and protection in any lighting condition. Polarized Reflex™ lenses provide superior glare reduction and enhanced styling.

## 04 / Venting Systems

Exhaust vents incorporated into the design framework enhance airflow to virtually eliminate fog and condensation, while strategically placed hybrid vents and side vents (available on select models) keep frames snugger on your face without compromising fit. This unique design feature is the only system available that allows maximum ventilation while blocking extraneous incoming light.

## 05 / Mastoid Temple Grip™

This proprietary design feature ensures the temple ends hug the mastoid bone (behind your ears), allowing for a secure and comfortable fit.

## 06 / Anti-Ocular Intrusion System®

This revolutionary system is designed to prevent your lenses from dangerously shooting toward your eyes in the event of an impact.

## 07 / Rhyno-Tuff® Air Frames

This proprietary high-performance thermoplastic material is extremely lightweight, yet durable enough to withstand high-velocity collisions and temperature extremes.

## 08 / Cushinol™ Nose Pads

This material ensures a soft feel and custom fit, regardless of your nose's shape or size.

## 09 / Cushinol™ Temple Boots

The proprietary composition of Cushinol™ creates a nonslip grip that keeps your sunglasses in place during athletic activity.

## 10 / Cam-Action Hinges

This patented feature allows the temple to quickly lock into position, getting you ready for action.

## 11 / Folding Plate Technology™

This revolutionary system uses complex contoured ribs in a section of the frame to control the flex of the temples. This maximizes the strength-to-weight ratio of the frame.

## Native Lifetime Warranty

All Native Eyewear is backed by a lifetime warranty. Manufacturer defects are covered for one year at no charge. All other claims, including scratched lenses, are covered for a processing fee of \$30 [sunglasses] / \$35 [goggles] — proof of purchase required. Lost or stolen items not covered.
